

# Killing Me Softly

## Part 9

### U.S. Air Force Pilot Exposes Top Secret Chemtrail Program — It's Called 'Operation Indigo Skyfold'

Chemical Geoengineering Operations Are Carried Out Worldwide — 24/7 — with False 'National Security' Justification. The following exposé is quite extraordinary by any standard.

A secret chemtrail pilot speaks out for the first time in modern history. He reveals information that's so classified and data so radioactive, he surely risked his life by releasing it. This brave military pilot makes clear the false justification for the patently unlawful and highly toxic chemtrail spraying of skies across America that has been taking place for decades — 'National Security'.

For years many folks have asked why do the chemtrail jet pilots participate in an atmosphere-polluting program that's so harmful to both people and planet.

ANSWER: Because they have been thoroughly mind-controlled into believing their chemtrail missions are undertaken to protect the American people. This is how the Deep State has always gotten away with so many deadly and destructive programs over the past century; they couch them within the fake context of national security.

In point of fact, nothing could be further from the truth. Chemtrail aerosols contain aluminum oxide, barium salts, strontium and other poisonous chemical compounds that have no business being in our atmosphere. The name of this illicit chemical geoengineering program is: **OPERATION INDIGO SKYFOLD**

"Maybe my fellow pilots will read or hear about this, and decide to come forward as well."

Finally, a military pilot steps forward and completely blows the lid off the unlawful and exceedingly destructive Global Chemtrail Program. What follows is a video which puts forth a true story about a courageous pilot who has broken ranks with his chemtrailing peers.

In so doing he has risked his life and the life of his family. As you listen to this presentation, or read the text provided below, bear in mind that chemtrails are being sprayed 24/7 around the globe with terrible consequences.

No matter what the stated reasons are given to those who fly the chemtrail jets, they are always told by their superiors that this ongoing and illegal atmosphere-altering program is being conducted in the interest of NATIONAL SECURITY.

You'll notice that NATIONAL SECURITY appears crooked because the whole intention behind geoengineering is as dangerously misguided as it is deceptively false. The indiscriminate, wide-area and systematic spraying of toxic aerosols throughout the skies of the world couldn't possibly have anything to do with 'national security'.

Those that buy into such a ridiculous notion have obviously been either brainwashed or bribed into believing such an absurd and nonsensical agenda. That's precisely why this unprecedented exposé is so important. Never before has anyone directly involved with the piloting of chemtrail airliners ever gone public.

Not only does "Blue Jay 1", as he is known, go public, he completely blows the lid off of OPERATION INDIGO SKYFOLD. This single act of identifying the name of what is perhaps the most destructive government program in recorded history is extremely critical.

WHY?

Because it now gives the worldwide anti-geoengineering advocacy groups a target to hit within their own nations and governments. How, after all, could government officials and political leaders at every level — federal, state, county and city — be so clueless about a massive aerosol spraying program that is going on in the skies right above them?!

Can any responsible representative continue to plead such ignorance or indifference and get away with it?

That's why this critical development is so huge! Really HUGE! It is what we have all been waiting for, yet so few in the movement really get it. Which is why this particular message has to be taken to the wider public.

Because at the end of the day — every day — every human being on every continent will REALLY abhor two things about the now ubiquitous chemtrails.

1. Chemtrails routinely transform warm sunny days into cool cloudy ones.

No one likes to see their clear sunny days stolen after a couple of hours of chemtrailing. Day after day of overcast skies have profoundly changed many a locale which have traditionally experienced clear skies. Is there anyone who prefers damp cloudy days to dry sunny ones?

Certainly the people of Florida and California want their fun in the sun! So does the rest of the USA.

2. Chemtrails contain a mix of toxic chemicals and poisonous compounds such as barium salts, aluminum oxide, strontium, mercury among many others, which eventually end up falling to Earth.

The chemtrail mix of toxins inevitably leaves its residues on farm fields and forests, lakes and ponds, and lawns and gardens.

How does one possibly stop the noxious chemicals from entering one's home and automobiles, office building and shopping malls? Who ever wants a toxic chemtrail brew dropped on them every other day?!

Geoengineering has proven — unequivocally — to be extremely detrimental to both human health and the greater planetary environment. As for the many adverse health effects, the link below gives an excellent summary.

### **Chemtrail Pilot Speaks Out:**

“First of all I would like to say that I do not agree with my mission assignments, but what soldier ever truly does? Several of us have considered bucking the ranks, and going AWOL from time to time. We are kept in the dark when it comes to getting honest answers about what we are really spraying. Should they discover that we or our families are actively enquiring about the so-called ‘chemtrails’ term, then automatic and swift disciplinary action would be taken.

HAARP and radar are two other non-allowed research subjects. Unless our children are learning about these in base schools, we cannot educate ourselves or our children through any public education system. I would not intentionally spray my children or family with toxic aerosols, but as you must know, perhaps 80% of the pilots do not have any family or children.

Indigo pilots are chosen from top ranks within the Air Force, Navy, and Coast Guard. Most of the pilots are ‘hardened to humanity’ and could care less killing off unwanted or leaching aspects of America and the world. I swear to you, the majority of the pilots are like machines, I call them “Tanker Terminators”.

I should not be telling you this, but nearly 1/3 of all flights are being orchestrated from small unnamed islands, where newly constructed bases are being built at a rate of 8 per year. On these extremely remote islands there are HAARP rays of every possible design, with many arrays surrounding these islands within the depths of the ocean itself.

The Navy has developed sophisticated underwater construction technology that allows fully autonomous robot submersibles to travel great distances, and even manufacture parts for these massive underwater arrays as they progress across the open sea floor.

Every time that you see or hear about military exercises at sea, they're basically there to give support and resupply their army of underwater robotic minions. There is possibly one

aquatic robot per plane, and will soon be double that. You will never be able to Google Earth or Search any of this.

Other than an occasional error in blurring some island bases, or smudged images of underwater arrays, it is impossible to locate all these advanced technological devices. They even paint fake clouds over some of our island installations to keep prying eyes away.

I have been shown some of these images by civilian friends. That is the reason I know this. I completely understand your concern for human safety, and here is the kicker. We are shown videos in our training of catastrophic destruction to our homeland by very sophisticated weapons, then told that these will be the consequences if we don't fly.

Our efforts in building a defensive atmospheric weapon shield are the only missions of its kind in the world. We are paid more than any other pilot for our service, other than Air Force One pilots who make as much or more and are kept in a dark, secret world for their own protection. They tell us that secrecy is our protection, and not to listen to any public rhetoric.

We all know about cyber program flash-point or FP- 03 as it is known within the veteran community. This program is a self-destruct sequence that can be remotely activated from any ground, water surface, underwater base, as well as any other air mobile unit. The signal is encrypted through three satellites and cannot be jammed or blocked. At any given moment you could have only 15 seconds to make your peace with your God.

They tell us that FP exists to keep planes from accidentally going down in heavily populated areas. They can remotely detonate our planes over safe zones, but in the back of your minds, our minds, we're pretty sure this is a fail-safe program to keep pilots from turning over assets to any public, private, or civilian authorities.

Have you ever seen any member of the crew survive the few crashes that have occurred? Every plane that has gone down was completely destroyed ... for good reason, I am sure. We risk our lives in more ways than one, every single time we fly, especially during night flights.

They are ordering us to fly at lower and lower altitudes. We feel like a massive "Dark Force Empire" of crop dusters, and know that one night Bubba, or Billy Joel, will fire their long rifles at us when we spray their moonshine-making operation, or pass over an illegal Mary Jane crop.

I know for a fact that some planes have been shot at, and subsequently brought down by mostly Russian, Chinese, and Korean weaponry, but the media will never cover these events as they are not allowed to report on our flights either. That must be true, for I have yet to see a detailed or in lengthy report of our missions on any public venue other than conspiracy shows and anti-government websites.

I risk everything for disclosing so much information and you will find very few like me. Even my own flight crew would have me arrested and court martialed if they knew of this dialogue. That is why I cannot email you directly, but from what your cousin tells me you are also risking everything just to get this information out to your colleagues.

I salute you sir, for standing up to the establishment and Big Brother. I would love to go home tomorrow and not rack up one more single minute of flight time, except for a sweet little Piper Cub, or Rat Tail Barn Racer. I miss those beautiful blue skies from my youth, and I am ashamed for hazing over that dream.

More importantly, maybe my fellow pilots will read or hear about this, and decide to come forward as well. I only know a small fraction of the larger picture, as they compartmentalize everything. Should I become aware of any new significant developments I will email your cousin.

The man I have contact with says he senses a wavering within the ranks, and that a kind of mutiny is beginning to boil to the surface of this whole geoengineering global whitewashing, if you catch my drift. My cousin still has friends in high places too, so he is helping to protect the pilot.

Last word from the pilot and I quote. "All pilots on leave are required to report to their CO by Dec 15th for special training operations, to qualify for Indigo Phase 2 flights, expected to be initiated by January 21."

Those were his words, not the actual Air Force message. He wanted me to stress that. He believes that the focus of their flights will be moved to areas east of California and Texas, in order to advance the drought further into the heartland; plus, he feels that a very new and extremely toxic chemtrail mix is going to be sprayed, using new technology that makes these special chemtrails completely invisible.

"Atmosphere shield of protection", he doesn't believe that either. So that is the end of the message from this chemtrail pilot.

From my own experience I've had a lot of contact with this guy for six months via the Internet, and basically everything he told me has turned out to be true, so I have no reason to doubt any of this, and hope you forward it.

This also points out how difficult it is to fight this program because people inside the program are not subject to public opinion or exposed to public information sources. Therefore, we need to brainstorm and come up with the way to shut down this program, as it is actually heating the planet, and killing everything with elevated UV rays, and toxic metals.

Thank you for listening.

## Conclusion

An active chemtrail pilot has quite courageously stepped out of the shadows at great risk to his career and his life. Such a sacrifice ought to compel the fast-growing community of anti-chemtrail advocates to disseminate his much needed message. Raising the worldwide awareness around this pilot's unprecedented disclosures seems essential toward shutting down the current form of global geoengineering.

Operation Indigo Skyfold has been OUTED. We now know its name. We now know how it works. We have been informed that it is being expanded in 2015 and is now more dangerous than ever.

-----

This segment in this series is but one of many examples by which globalists operating within the U.S. Military are part of a massive "Depopulation" effort that began with the Club of Rome in 1968. I first began observing chemtrails in the sky about 1996. Reports began appearing on the Internet 1997. The spraying has done irreparable harm to nature, farm fields, and the environment. In 1996, I began reading newspaper reports of Kentucky residents having respiratory issues and statewide hospital reports of hospital admissions believed to have been connected to chemtrailing in some way or other.

Clifford Carnicom was the first one to report on the Internet the chemtrail spraying. Today Cliff Carnicom operates Carnicom Institute as is a non-profit organization working solely for the benefit of humanity. The Institute goal is to provide the public with beneficial and responsible information through scientific, educational, environmental, and health research for the public welfare. The Institute is currently focused on the important issues of geoengineering and bioengineering.

Clifford Carnicom has appeared on Coast-to-Coast radio and numerous other sites over the years. Clifford Carnicom, who has been actively involved in bringing attention to the chemtrail phenomenon, has been a self-employed professional computer consultant for the past three years, and now resides in Santa Fe, NM with his wife Carol. He was previously a research scientist and federal employee for 15 years with three different agencies, including the United States Department of Defense, the Bureau of Land Management and the U.S. Forest Service. His technical background is extensive in the fields of geodetic science, advanced mathematics, computer science and the physical sciences.

Another vocal activist is Dane Wigington has a background in solar energy. He is a former employee of Bechtel Power Corp. and was a licensed contractor in California and Arizona. Dane is host of the web site GeoEngineering Watch.com. One can subscribe to Dane Wigington's web site and weekly reports. Anyone familiar with "The Health Ranger Report" hosted by Mike Adams may have learned of Dane through Mike Adams. (Natural News). Geoengineering expert and weather control analyst Dane Wigington unloads the true globalist agenda behind weather control technology in a fascinating one-hour interview with the Health Ranger of Natural News. The interview covers the existence of weather engineering technology, who controls it, how it's deployed and why the United States is being targeted now that President Trump is in the White House.

"Geoengineering" refers to alterations of the atmosphere, a subject that's openly endorsed by Harvard scientists and mainstream researchers. Geoengineering experience, in fact, are being openly conducted by academic scientists right now in an effort to dim the sun and initiate "global cooling."

Dane Wigington of GeoengineeringWatch.org explains that geoengineering technology has advanced far beyond the application of particulate matter into the atmosphere. According to Wigington, advanced technology can now augment and steer large weather systems into their intended targets. This, he explains, enables globalist camps to "weaponize" weather systems and transform them into weapons of mass destruction.

As revealed in the interview, below, the key advantage of weaponized weather systems is that their hugely destructive effects — over \$90 billion in damage in Houston alone from Hurricane Harvey — can simply be blamed on Mother Nature. Weather weapons are, in effect, covert weapons where even the victims who have been struck by the weapon have no idea they've been deliberately targeted in a kinetic assault.

Not everyone believes in the existence of weather control technology, however, even though the U.S. patent office has granted patent approval status to at least 175 weather control inventions that exhaustively detail advanced technology systems for augmenting and steering large storms.

Additionally, it is common knowledge that scientists actively engineer almost everything else, including food and water. As I wrote in Natural News:

Many people find it difficult to believe that weather systems can be engineered, yet they readily accept the reality that the food supply is genetically engineered. Municipal water systems are engineered and altered with fluoride and chlorine. The global money supply is engineered and heavily manipulated by central banks. All the news that appears in the corporate-run media is, of course, engineered to broadcast outright lies such as “the Russians stole the election.”

Human biology is engineered and altered by prescription pharmaceuticals, and even brain function is altered and engineered by psychiatric drugs. Heavy metals such as uranium and plutonium have been engineered into atomic weapons, so why is it so difficult to believe that weather systems could also be engineered through advanced technology?

My interest in weather modification came through a book by Dr. Nick Begich titled *‘Angels Don’t Play This HAARP: Advances in Tesla Technology’*. I came across the intriguing title that caught my attention in a book store about a year after it was published in September of 1995. I am currently reading another new book, *‘Under an Ionized Sky: From Chemtrails to Space Fence Lockdown’* by Elana Freeland, published in 2018.

Earlier the military pilot who came forth and revealed the program, also mentioned HAARP. HAARP is much larger than the system located in Gakona, AK. The facility that was originally operated for Atlantic-Richfield by Dr. Bernard Eastland. There are those who attempt to debunk HAARP on the Internet, such as Metabunk.org. They even debunk Dr. Bernard Eastland. HAARP is no musical instrument as the acronym reveals.

Weather as a weapon of mass destruction? With technology at the point it is now, the answer is YES. And weather as a weapon has been the goal of many for a long time. Some of you may have heard of the name William Cohen. In April, 1997 Secretary of Defense William Cohen, speaking at a conference on Terrorism, Weapons of Mass Destruction and U.S. Strategy in his official capacity as the US Secretary of Defense said, *“Others are engaging even in an eco-type of terrorism whereby they can alter the climate, set off earthquakes, volcanoes remotely through the use of electromagnetic waves.”* This can be taken as an official position of the United States.

He used the word “are,” not “could,” “might” or “maybe sometime in the future.” He added: “It’s real, and that’s the reason why we have to intensify our efforts.” If the United States Secretary of Defense says that the earth and the sky have been turned into weapons,

and are being used as such in present time, I believe we should take this statement very seriously.

While Hurricane Irma, which was reclassified as a tropical storm, spared Miami from a “worst case” scenario, the former hurricane saved some of its worst storm surge impacts for northeast Florida, coastal Georgia, and South Carolina.

A record water surge flooded downtown Jacksonville, leading to a flash flood emergency as the water level rose sharply. Hours of strong winds blowing the ocean inland, and preventing water from the St. Johns River from escaping back into the ocean made the flood situation even worse.

The flooding, while “predicted,” was some of the worst the city has ever seen. Despite being weaker than Hurricane Matthew was when it passed by the city in 2016, Tropical Storm Irma helped push a greater amount of water onshore, and it struck right at the time of high tide. This caused the city to see its highest storm surge flooding on record.

Weather modification is now possible. As early as 1947 the US Navy, Army, and Air Force, working with General Electric Corporation, made the first attempt to modify a hurricane under Project Cirrus. They dropped about 80 pounds of dry ice into the clouds.

Project Cumulus, carried out by the British Royal Air Force between 1949 and 1952, included cloud seeding experiments over southern England. It was said to be responsible for the 1952 flood in the Devon village of Lynmouth, which resulted in 34 deaths and the destruction of multiple structures.

In the 1950s the US Forest Service carried out a project called “Skyfire” when they experimented with cloud seeding techniques to decrease lightning in order to reduce forest fires. Then, under Project Stormfury which lasted for about 20 years, the United States Government tried to disrupt the inner structure of hurricanes in the Atlantic by flying aircraft into them, and seeding them with “silver iodide.”

Weather modification consists of three major categories:

- 1) suppression of weather patterns,
- 2) intensification of weather patterns, and in some cases the
- 3) introduction of completely new weather patterns.

The two basic methods to accomplish weather modification include “cloud seeding” and “directed-energy.”

**Multiple countries, including the United States, are now modifying the weather.** In November of 1997 the Wall Street Journal reported that in order to dissipate excess fog, the Malaysian government would be signing an agreement with Russian officials for use of technology which would allow them to create a cyclone.

The state-run Oklahoma Weather Modification Program conducts cloud seeding operations in Oklahoma to enhance the development of rain showers and thunderstorms. In October of 2005, Business Week reported that China, Russia, and Mexico were modifying the weather, with **China spending about \$40 million a year** on a weather management program.

Since the early 1960's Weather Modification Incorporated of Fargo North Dakota has offered a professional weather modification service to insurance companies, water resource management groups, and federal and state government research organizations. They specialize in weather modification, “cloud seeding, rain enhancement, and fog dispersion.”

A Russian company called “Elate Intelligent Technologies Incorporated” has offered a professional weather modification service using directed-energy since at least 1992. The unit consists of a power supply which provides current to a series of antennas that focus an electrical charge into the air. **The unit is connected to a computer and can tailor weather patterns over a distance of about 200 miles.**

According to US military reports in 1996, weather modification will be used across the entire spectrum of conflict to achieve **“domestic”** and international military objectives. Weather modification has already been used for military purposes.

During the Vietnam War the US Government used weather as a weapon under Project Popeye, which was an attempt to increase the rainfall over a supply route called the Ho Chi Minh Trail, which extended from North to South Vietnam. The technique used seeding units which were composed of “silver iodide” developed at the Naval Weapons Center in China Lake California. The project began in 1966, lasted for 5 years, and was considered a success. In 1970 Zbigniew Brzezinski, cofounder of the “Trilateral Commission,” advocated the covert use of weather attacks, such as long periods of **drought or storm, to force a nation into compliance.**

The United Nations Weather Weapons Treaty of May 1977 warned that scientific and technical developments may open new possibilities with respect to modification of the environment and that the hostile use of these techniques could have **effects extremely harmful to human welfare.**

The US Air Force mentioned that the UN’s weather modification treaty, which prohibits the hostile use of weather modification, is not applicable because “their attacks will not be large scale” (encompassing several hundred km), long lasting (several months in length), or result in serious injury to human life.

Regarding the deception which will be used to mislead the enemy and create conditions of deniability, the US Air Force said that the enemy’s information systems would be spoofed so they’d make wrong decisions. The spoofing would also allow them to disguise their weather attacks, which they said would be **“indistinguishable from naturally occurring weather.”** The Naval Law Review’s 1998 article, “A Primer on the Employment of Non-Lethal Weapons,” stated that weather modification could be used as a NLW (Non-Lethal Weapon).

A 1994 US Air Force report also advocated using “weather attacks” to reduce the comfort levels of the enemy. These weather attacks, according to NLW advocate John

Alexander, will play a strategic role in future conflicts. He describes weather warfare as a possible **“weapon of mass destruction.”**

The US Navy’s 1994 Non Lethal Warfare Proposal, acknowledged the successful use of weather modification as an instrument of warfare in Vietnam and described how the creation of “floods, blizzards, and droughts” could be used to destroy a nation’s economy.

The creation of fog is now possible. Synthetic **fog made from glycols and glycerin** has even been proposed as a nonlethal weapon. Fog has been widely used in the entertainment industry for years. According to the US Air Force, **equipment exists which will quickly generate thick fog 100 meters long.**

**A precision lightning strike with synthetic lightning is also possible.** Artificial lightning is accomplished using lasers. One reportedly had a range of about 200 meters, but could possibly be extended to about 2 miles. The US Air Force was considering using such lasers for lightning attacks. Lasers can even be used to cut holes in the ozone layer above the land of an adversary.

HAARP (High Frequency Active Auroral Research Program):

Weather modification is possible using electromagnetic waves. In the US and other countries, large weapons platforms to accomplish this have been created.

In their book *'Angels Don't Play This HAARP': Advances in Tesla Technology*, Jeane Manning and Dr. Nick Begich refer to it as **one of the most powerful multi-purpose weapons developed by the US military.**

HAARP is a world-class facility located in Gakona Alaska which consists of a megawatt radio transmitter and the most sophisticated technology available. It appeared in a 2009 History Channel documentary called *Weather Warfare* and, a Discovery Channel program in 2005 entitled, *Owning the Weather* for its weather control capabilities.

It works by **heating the ionosphere**, which is an active, electrically-charged part of the upper atmosphere, that exists **from 40 to 500 miles above the earth**, and which **acts as a shield against the bombardment of high-energy particles from space.**

The primary component of HAARP is a radio transmitter called the Ionosphere Research Instrument (IRI), also called the phased array. It consists of 180, 72' tall towers that collectively transmit a narrow beam of energy from 2.8 to 10 MHz.<sup>4</sup> The towers are mounted on thermopiles spaced 80' apart in a 12 x 15 rectangular arrangement. Each one has two crossed antennas (dipoles) at the top, one for the low band (2.8 to 8.3 MHz), the other for the high band (7 to 10 MHz).

The entire IRI is surrounded by a fence and sits on gravel padding on about 40 acres of land. There is a reflector screen about 15' from the ground which helps to redirect energy from the IRI while allowing vehicular access underneath it.

Every dipole has its own transmitter. The transmitters are located underneath the IRI in 30 environmentally-controlled shelters that are 38' long by 8' wide by 10' high. Each contains 12, 10 kW transmitters for a total of 360 transmitters that supply the IRI with 3.6 megawatts of power. The transmitters themselves are powered by 5 large generators that produce 16 megawatts of power.

The energy generated by the IRI is combined into **"a single focused steerable beam that heats and lifts exact portions of the ionosphere."** The beam is capable of making a series of invisible ionospheric mirrors which **"create a conduit for energy transfer over great distances."**

It has a variety of diagnostic instruments to monitor its effect on the atmosphere. They include ELF and VLF receivers, a digital HF ionosonde, magnetometers, photometers, a VLF sounder, and VHF riometer. It also has HF receivers, UHF and VHF radars, optical and infrared cameras, and other sensing equipment.

HAARP was created in three phases. The first was the Developmental Prototype (DP), which had 18 antenna elements, organized in three columns by six rows. It used about 360 kW of combined transmitter power. The next was the Filled Developmental Prototype (FDP) that had 48 antenna units arrayed in six columns by eight rows, with 960 kW of transmitter power. The current and presumably final phase, called the Final IRI (FIRI), was completed in March 2007, and consists of the specifications previously mentioned.

The best scientists in ionosphere research were consulted to build HAARP. The facility, including computer systems and controls, was designed and built by British Aerospace Systems (BAES) and Raytheon Corporation, on contracts funded by the Air Force, Navy, and DARPA.

It was approved by congress for funding in 1990 by its defense spending bills. Research for HAARP began in 1992 by Advanced Power Technologies Incorporated, (APTI), a subsidiary of the Atlantic Richfield Corporation (ARCO). APTI, along with the HAARP patents, was sold to E Systems Incorporated in 1994. Raytheon then acquired E Systems and now owns the patents. It and BAES were the two biggest participants in its creation.

Other institutions that helped to create it include: the University of Alaska, Boston College, UCLA, Clemson University, Dartmouth College, Cornell University, Johns Hopkins University, University of Maryland, College Park, Penn State University (ARL), University of Massachusetts, MIT, Polytechnic Institute of New York University, Stanford University, and the University of Tulsa. These institutions are contributing to future research efforts.

HAARP is managed by the US Air Force's Research Laboratory (AFRL), the Office of Naval Research (ONR) of the US Navy, DARPA, and the University of Alaska's Geophysical Institute. The management team also consists of scientists from universities, the private sector, and government.

The ELF waves which it produces can be transmitted over thousands of kilometers covering a significant portion of the earth through a waveguide, which is a type of virtual pathway formed by the ground and ionosphere. **These waves will pass through basically every non-shielded structure on the planet.**

HAARP is also capable of transferring massive amounts of energy to specific points on the planet by creating a virtual conduit consisting of a series of ionospheric mirrors. What does a hurricane need to gain strength and power? Heat... They're created by focusing energy on an area of the ionosphere to cause a depletion of electrons, which alters the refractive properties of that specific area. The mirrors are shaped to exact dimensions to redirect the energy to a predetermined destination.

According to the US Air Force, AIMS emitted from a ground-based system could allow the precise delivery of electromagnetic radiation at any frequency up to 2 GHz. They would be created to function on a specific frequency, and would allow the transmission of radiation based on that exact frequency through the ionosphere. By creating virtual mirrors in the ionosphere, HAARP is also capable of over-the-horizon communication.

HAARP is basically a multi-purpose tool. It exists to detect underground structures, to search for natural resources, to address national security issues, to communicate with submerged submarines using ELF waves, for surveillance purposes, and to examine new options for strategic communications. And to modify and create weather?

The HAARP website describes its purpose in the most innocent way: “The program’s purpose is to provide a research facility to conduct pioneering experiments in ionospheric phenomena ... for developing ionospheric enhancement technology for communications and surveillance purposes.”

The DOD says that HAARP is used to enhance the performance of C4ISR systems. It will provide communications for submarines, and geophysical prospecting using earth penetrating tomography (EPT) to detect natural resources such as oil, mineral deposits and gas. EPT is also used to detect underground facilities for national security reasons.

Dr. Bernard Eastland, the physicist who developed the concepts for HAARP in several patents dating back to the 1980s, was retained by APTI as a consultant. Dr. Eastland revealed that the military was interested in his plans for a weapon which would direct energy into the ionosphere to destroy enemy rockets and disable communications. That revelation was the reason for debunking Dr. Eastland on the Internet.

The military denies that HAARP is based on Eastland’s patents. However, there is considerable triangulation between Eastland’s patent/HAARP, the military’s capabilities and interests, and Dr. Nikola Tesla’s Death Ray.

HAARP is based on Eastland's patents, which themselves originate from the work of Dr. Tesla. Dr. Nikola Tesla, the famous inventor and winner of the 1915 Nobel Physics Prize, is credited with many inventions, including wireless technology and alternating current electricity. Dr. Tesla worked with Wall Street industrialists such as J.P. Morgan who withdrew their funding after realizing that **he was inventing mechanisms to deliver free unlimited energy**. As a result, Dr. Tesla became blacklisted.

Although he was probably the greatest inventor that ever lived, many of the comforts we enjoy today that he created have not been attributed to him because of this. The globalists and elites could not control his inventions and therefore shut down.

Dr. Tesla had plans for an aircraft that could rise vertically and use the earth's magnetic fields as a means of propulsion, as well as a watch-sized device, which would allow the instant, clear, wireless transmission of sound to any place on the planet. Another one of his inventions included a small electrical engine capable of moving a vehicle up to 90 miles per hour. After his death in 1943 **his belongings were seized by the FBI and declared top secret**.

And more likely than not, have been continually being developed by the elite and deep state governments of the world.

It was reported by the New York Times in July of 1934 that Dr. Tesla had plans for a death ray that was capable of destroying a fleet of 10,000 airplanes at a distance of 250 miles from a nation's borders. The beam could cause armies of millions to drop dead immediately. It could operate silently and invisibly, from a great distance, and leave no evidence of its use. *"An army of 1,000,000 dead, annihilated in an instant, he [Dr. Tesla] said, would not reveal even under the most powerful microscope just what catastrophe had caused its destruction."*

US Patent #4686605 of August 11, 1987, issued to Dr. Eastland, was kept sealed for about a year under a government secrecy order. It describes a ground-based, multi-purpose weapon that uses microwaves to ionize select portions of the atmosphere.

For anyone interested in Scalar Technology, HAARP applications, the go-to source of information is retired Lt. Col. Thomas Bearden, PhD.

**There is enough energy inside the space in this empty cup to boil all the oceans of the world. This is a fact well known to the scientific community, and was, for example, a favorite quote of Nobel Prize winning physicist Richard Feynman.**

The previous illustration and quote comes from Dr. Bearden's web site. I include it to illustrate the point that HAARP is not a musical instrument and that scientists around the world are working day and night developing "Star Wars" type weapons. I bought one of Dr. Bearden's books on Scalar Technology back in 1999, in order to become aware of what humanity is facing.

The patent recommended northern Alaska as the location for the weapon due to its abundance of natural fuel sources. The invention provided the ability to focus unprecedented amounts of power in the earth's atmosphere at strategic locations.

Dr. Eastland's weapon can disrupt or even modify satellite communication by using magnetic mirrors to intercept their microwave transmissions. These mirrors can also be used to intercept other types of wireless transmissions for eavesdropping purposes, or to enhance friendly communications.

They can provide total disruption of communications over a very large portion of the earth. According to the patent, all modes of civilian and military communications including land, sea, and air, could be disrupted simultaneously. Dr. Tesla's invention consisted of large, land-based, stationary power plants affixed with transmitters. A mobile death ray was in the making by him, as reported in the New York Sun's July 11, 1934 article, Death-Ray Machine Described.

The US Air Force mentioned that a ground-based directed-energy weapon could be used to create a series of AIMs in the ionosphere, which would allow over-the-horizon communications, as well as the disruption or interception (eavesdropping) of enemy communications.

According to the Air Force, **the same technology could be used for weather modification.** “The implications of such control,” says the Air Force, “are enormous: one would no longer be subject to the vagaries of the natural ionosphere but **would have direct control of the propagation environment.**”

The precision with which this device can target an area, the atmospheric characteristics of an area can be altered. This means the “manipulation of weather patterns.” The patent specifically states that “weather modification is possible using mirrors to direct energy into the ionosphere.”

In 1935, Dr. Tesla had been working on a unit which would transmit energy into the stratosphere to light the sky in order to eliminate the dangers of nocturnal navigation. This seems similar to the Navy/Air Force’s 1998 report, which tells us that **HAARP is capable of lighting up the skies with megawatt power.**

According to Eastland’s patent, the guidance systems of missiles and aircraft can be disrupted by lifting large regions of the atmosphere to create drag so they’ll encounter friction, or encompassing them with an electromagnetic sheath to disrupt their functioning. *“This would have significant military implications,” “particularly as a barrier to or confusing factor for hostile missiles or airplanes.”*

Dr. Tesla had developed plans for a land-based weapon consisting of multiple power houses that projected a beam of destructive energy which could destroy almost anything. It could also provide a **“protective dome” around an entire country.** “Anything with which the ray came in contact would be destroyed.” **“Planes would fall, armies would be wiped out and even the smallest country might so insure ‘security’ against which nothing could avail.”**

Another characteristic connecting Eastland’s weapon to Tesla’s Death Ray is illustrated in **US Patent 5038664**, also issued to Eastland. It describes how a protective dome could cover a select surface of the planet. This is referred to as the “Tesla Dome”.

It works like this: One beam of circularly polarized electromagnetic radiation in the frequency range of 1800 to 3600 kHz forms the initial dome. A second beam in the range of 20 to 1800 kHz is then aimed at the top of the same region to further ionize the existing plasma. The second beam raises the mirror points of the existing plasma. **The combination of these energy beams creates a protective dome of 20 million volts.**

According to E Magazine, Pravda, Wired, and independent media such as Global Research, and other sources which **base their claims on available factual information**, HAARP is capable of causing **droughts, floods, hurricanes, tornadoes, earthquakes, volcanic eruptions,**

**and lighting the skies with immense power.** Although it seems unbelievable, it is much worse than you can imagine.

It is allegedly capable of “destroying the electronic systems” of aircraft, missiles, and space satellites, as well as disrupting radio, TV, and radar signals. These claims are consistent with the US military’s admitted objectives regarding weather warfare.

Professor Chossudovsky of the independent media outlet ‘Global Research’ says that although HAARP is presented to the public as a scientific research institute, its capabilities suggest otherwise. **“HAARP is part of the weapons arsenal of the New World Order,” he announced.**

A nation’s economy could potentially be disrupted through climatic manipulations. This can all be accomplished, says Professor Chossudovsky, **without the target country realizing that an attack had caused the collapse.**

Custom tailored weather attacks on a micro level will be used with communications disruption for, “complete dominance of global communications and counter-space control,” announced the U.S. Air Force in its Weather as a Force Multiplier: Owning the Weather in 2025 report of August 1996. This will be accomplished using high-powered microwaves directed into the ionosphere. “Weather-modification offers the warfighter a wide-range of possible options to defeat or coerce an adversary.” The facts exist to show the U.S. Air Force already owns the weather eight years before its declared date of 2025.

‘Wired’ announced in January 2008 that an online Russian military journal ([www.nuclearno.ru](http://www.nuclearno.ru)) referred to HAARP as a “geophysical weapon” cloaked as a research facility, capable of triggering earthquakes and destroying the economy of an entire country.

According to Brzezinski, weather warfare and other high-tech weapons would be available to the leaders of some countries to launch “covert weather attacks” against other nations. He also specifically mentioned the use of “death rays” for conducting what he described as secret warfare.

Dr. Tesla claimed his death ray was so accurate it could *“paralyze or kill anyone on the planet.”* *“It is perfectly practicable,”* he announced, *“to transmit electrical energy without wires and produce destructive effects at a distance.”* *“With transmitters of this kind,”* explained Dr. Tesla, ***“we are enabled to project electrical energy in any amount to any distance and apply it for innumerable purposes, both in peace and war.”***

In addition to HAARP’s destructive capabilities that span the physical realm, the ELF waves which HAARP can produce, include **the exact same dominant frequencies on which the human brain functions.** These waves have a documented effect of entraining the human brain to induce negative emotions such as “anger, fear, disgust, rage, and depression.”

Congressman Dennis J. Kucinich of Ohio attempted to ban weapons such as HAARP in October of 2001 by introducing the Space Preservation Act of 2001. This would have prohibited all land-based directed-energy weapons capable of manipulating the ionosphere to change the weather or attack people. (Specific references were made to weapons capable of **information war, mood management, and mind control.**)

“An analysis of statements emanating from the US Air Force,” commented Professor Chossudovsky, **“points to the unthinkable: the covert manipulation of weather patterns, communications and electric power systems as a weapon of global warfare.”**

Its potential, as revealed in the available military documents, combined with the capabilities outlined in the patents, plus the inventions of Dr. Tesla in the early 1900s, suggests that HAARP has much to do with both Eastland’s patents and Dr. Tesla’s work on which they were based. This evidence portrays HAARP disguised as a “scientific research facility.”

Reports that the High Frequency Active Auroral Research Program (HAARP) had been shut down permanently were apparently a bit premature. According to HAARP program manager James Keeney, the facility is only temporarily off the air while operating contractors are changed. So why does anyone care? Despite being associated with various natural disasters over the past two decades by the conspiracy fringe, HAARP is in reality a facility for studying the ionosphere. Let’s take a look at the goings on at HAARP – past, present, and future.

HAARP was established in 1993 by the US Air Force, the US Navy, DARPA, and the University of Alaska. Located outside of Gakona, Alaska, the facility houses a high frequency (HF) transmitter together with a phased-array antenna to focus and direct the radiated RF power. The transmitter is roughly as powerful as the largest military radars, generating up to 3.6 MW of RF power in the 2.8 to 10 MHz band. HAARP is restricted to operations only at specified frequencies in this band. Its cost was estimated to cost the U.S. taxpayers \$300-million. Its expansion was authorized by Congress in the early 2000’s, with the construction of the additional transmitter towers to its complement of 180 transmitters.

The power isn't what makes HAARP different. Rather, the credit for that goes to HAARP's phased array antenna. Consisting of 180 individual dipole antennas placed in a field roughly 13 hectares (33 acres) in size, this antenna array acts as a highly directional antenna, with a beam-width of about five degrees. By the time the RF energy reaches the ionosphere (say, at an altitude of 200 km /124 mi just for this example), the size of the radiated spot is about 18 km (11 mi) in diameter, and the power density is roughly 14 mW/sq m. As the ionosphere is opaque in HAARP's frequency band, it absorbs nearly all of the incident power.

A tricky point, the misunderstanding of which has led to various HAARP conspiracy theories, is the difference between radiated power and effective radiated power. HAARP's radiated power, the amount of actual RF power it can emit, is 3.6 MW. However, because HAARP's antenna focuses the radiated power on a small portion of the ionosphere, the power

density on that spot is much larger than would result if HAARP's antenna were non-directional so that its RF power were directed uniformly in all directions.

A fictional "effective radiated power" can be calculated, which is the power that would have to be sent through a non-directional antenna to provide HAARP's power density to the entire sky. This value is about 5.8 GW. The value is much larger than HAARP's actual RF power, as only 0.06 percent of the sky is illuminated by HAARP's antenna. But the effective radiated power appears in many conspiracy theories simply as a scary large number.

How big is the actual power density in HAARP's ionospheric spot? The total irradiance of the Sun's electromagnetic radiation (everything from x-rays to extremely low frequency (ELF) radio signals) is 1,360 W/sq m, measured by satellite outside the bulk of the Earth's atmosphere. HAARP's power density is about 0.001 percent of the Sun's irradiance – a nearly negligible quantity. Further, while local heating of the ionosphere is caused by HAARP (indeed, that is HAARP's purpose), the overall effect is rather like focusing the Sun's light using a magnifying glass – impressive if one is an ant, but not very significant on larger size scales.

HAARP is designed to test the response of a patch of the ionosphere at varying altitudes to the application of a few mW/sq m excitation in the high frequency (HF) radio band. One known effect is the generation of extremely low frequency (ELF) radio waves through modulated heating. By turning the HAARP array off and on (or more simply, by wiggling the focal point around in a repetitive pattern, a procedure known as geometric modulation), the local ionospheric temperature rises and falls, changing the conductivity in that portion of the ionosphere at whatever frequency corresponds to the pattern. The frequencies are typically in the vicinity of a few to a few hundred Hertz.

HAARP is located where large natural electrical currents flow through the atmosphere. This auroral electrojet flows from the position of the Sun at noon to the position of the Sun at midnight in the north and south polar regions of the ionosphere. The flowing currents circle the poles, rather than passing over them, and may be thought of as sheets of current with a typical current density of 1-2 amperes per meter.

Given HAARP's spot size of about 18 km, the heated region has passing through it a current of about 30 kA, depending on geomagnetic conditions. When the ionospheric conductivity changes from HAARP's transmissions, the current in and around the spot also changes its distribution. That makes the region near the spot an antenna that radiates ELF radio waves from the ionosphere. HAARP is not, however, an efficient source of ELF radiation – starting with 3.6 MW, the yield of ELF radio waves is less than 10 W.

What can you do with 10 W of ELF radio waves? Well, a typical ELF submarine communication system uses several megawatts of ELF RF power with a frequency of 70-90 Hz. This is directed into the surface of the Earth at points separated by about 50 km (31 mi) in order to use a large area of the Earth's crust as a transmitting antenna. Despite the huge power and

massive antennas, the actual transmitted power of such a system is only a few watts. So one reason for HAARP's development was to prototype a (relatively) small ELF transmitter.

Magnetospheric wave injection:

Another phenomenon studied by HAARP is called magnetospheric wave injection. While most of the ELF waves generated in the ionosphere by HAARP are directed down toward the Earth's surface, a small fraction leaks into the surrounding magnetosphere. In the inner magnetosphere, wave interactions are dominated by the Earth's static magnetic field.

Most study has been directed to a whistler-mode instability. Imagine you have a PA system with the volume turned up just short of the point when spontaneous feedback will occur. If you whisper into the microphone, you will hear your amplified whisper. However, immediately on speaking loudly into the microphone, your voice will be drowned out by feedback at the characteristic frequency of the PA system. The potential power output of the PA was always available, but requires a small push to tilt the system into runaway feedback. This behavior is rather like that of a whistler-mode instability.

Non-linear magnetospheric amplification of such waves can be caused by resonant interactions with energetic electrons. This being a non-linear interaction, one of the signatures is a change of the frequency of oscillation. The one-hop (Alaska to the South Pacific) and two-hop waves (back to Alaska) detected at the surface both show non-linear smearing of the wave frequency as well as amplification from the whistler-mode instability. It appears that the magnitude of the amplification has not been firmly established, but it is not enormous.

Ionospheric and magnetospheric structures and effects are the subject of ongoing study at HAARP, with a number of experiments being scheduled for later this year. Hints of interesting behavior have emerged, such as the possibility of generating ELF radio waves at times when the auroral electrojet has very little current, suggesting that interesting physics is yet to be discovered and understood.

Mind control and earthquakes:

Getting back to the conspiracy theories for a moment, these come in a plethora of bizarre and unfounded varieties. To name just a few, HAARP is accused of triggering earthquakes by lifting the ionosphere over a tectonically active region, then letting it fall so that the pressure wave will trigger the earthquake. There are two problems with this. First, HAARP is pretty well limited to heating the ionosphere directly over its physical location. Second, a falling object can at best deliver the energy that went into lifting it. As we know that energy was delivered via a 3.6 MW RF beam, it seems incredibly unlikely that an earthquake could be triggered by turning off HAARP.

Mind control is also supposed to be within HAARP's capabilities. This would be accomplished by altering the 7.8 Hz Schumann resonance, which is the Earth's lowest frequency electromagnetic resonance. After stating as fact a totally evidence-free relationship between life itself and the Schumann resonance, one conspiracy theorist says that "1,700 billion watts"

will apparently drive HAARP's mind-altering effect. That is a rather remarkable claim, as HAARP's maximum power is about one-five-hundred-thousandth of that amount. The theory remains to be seen, but then it is unlikely we would ever know it when it happens!

I'm just an amateur in all this, however, I have been observing chemtrails for two decades now, observing the bizarre weather patterns, and there is one thing I am sure of and that is former vice-president isn't totally lying by saying that humanity is responsible for global warming or global cooling; he really should qualify that statement by which segment of humanity is the culprit for weather modification.

During the summer of 2013, I was walking my dogs down to the mail box at the corner. A friend of mine back in Pittsburgh called me as I was gathering my mail from the box, and walking the dogs over to the adjacent corn field where we lived at in Fredericktown, KY. I commented to my friend that it was a beautiful blue sky and that I hadn't seen a chemtrail in over a month. It wasn't thirty minutes later before an aircraft laid down an 'X' design directly over where I was standing. I cannot tell you how unnerving that event was for me. Knowing what I have read and studied, little would surprise me of what we are not aware of.

Apart from the devastating health effects of cell towers, the day is now approaching in which government mind control technologies will be directed at you, your neighbors, and your loved ones. Every single day, equipment is being erected and installed in this country with the

hidden purpose of exerting mind control over the entire population. Everywhere in this country, ELF/microwave transmission (cell phone) towers are being erected. The antennae usually look like four slightly curved vertical plates about 2 to 4 feet in length and located in either 3 or 4 quadrants around the tower, roof, or chimney. Just look around and you'll see them. And you'll also notice more of them going up once you begin to pay attention. No one is saying anything, but you're expected to presume that they're for cell phones.

Do you really think that we need that much 'cell phone' transmission capability? Hardly. These mind control technologies have been in place for a long time. It's not an accident that the frequency band chosen for cell phone use just happens to match the second order waves that Wilhelm Reich discovered in the late 1940's to effect thought transmission and allow the mind to be manipulated without the victim realizing it. Reich worked on this project secretly for the CIA for over 5 years, from 1947-1952, until he realized who the CIA was planning to use the mind control on - the American people. He was outraged that he was deceived and used for such a devious motive and swore never to cooperate with the CIA, NSA, or FDA again.

Reich was murdered in Federal prison in 1957, just a few weeks before he was due to be released, having been in prison for 2 years on a false, trumped up charge of contempt of court. The mind control effects of these transmission frequencies can vary from bringing on sedation, nausea, or emotional and mental confusion. Behind the proliferation of cell phones being hyped upon us, despite their health dangers, there is a hidden motive. And with the rapid proliferation of ELF transmission towers, that motive is abundantly clear. Mass mind control of the population, and the destruction of our health in the process. These microwave emissions from phone masts may become the biggest singular cause of human suffering, and possible premature death, in the years to come.

I have in my files a document that I printed out 8/17/2008. The source of the document is not accessible on the Internet today, as so often the case these days. The article is titled "Mind Control From Cell Towers – The Hidden Plan". The document corroborates the story of Wilhelm Reich in the two paragraphs above.

I have been going through files of computer print outs and documents going back some twenty-five years. I have been cleaning out files and files that will simplify the task of family when I go to be with the Lord, if I should miss the Rapture. One of those files is titled: "Total Population Control". It was written by a BBC journalist and author. The date of this article included below was July 12, 2002. This article certainly confirms the worst case scenario of what some would consider "conspiracy theory". I leave it to the reader to draw his or her own conclusion.

### **Total Population Control**

[Editor's Note: This is a highly revealing and insightful overview of the ELF, GWEN towers, and HAARP inter-connection. It was posted some time ago on Al Bielek's web site before Al went off the air, but its content is as timely today as when it first came out. The same author, Nicholas Jones, posted an excellent article about Chemtrails, Peanut Butter and Barium Sandwiches on Jeff Rense's web site a few months ago. This might be the same Nicholas Jones who is a BBC journalist and author of two books on Spin Control..]

Earth is wrapped in a donut shaped magnetic field. Circular lines of magnetic flux continuously descend into the North Pole and emerge from the South Pole. The Ionosphere, an electro-magnetic-wave conductor, 100 kilometers [62 miles] above the earth, consists of a layer of electrically charged particles acting as a shield from solar winds.

### **Earth Resonant Frequency**

Natural waves are created which result from electrical activity in the atmosphere. They are thought to be caused by multiple lightning storms. Collectively, these waves are called '*The Schumann Resonance*', with the strongest current registering at **7.8 Hz**. These are quasi-standing [scalar], extremely low frequency (ELF) waves that naturally exist in the earth's *electromagnetic cavity* which is the space between ground and the ionosphere. These 'earth brainwaves' are identical to the frequency spectrum of our human brainwaves.

[Frequency nomenclature: 1 hertz = 1 cycle per second, 1 KHz = 1000cps, 1 Mhz =1 million cps. Wavelength: A 1 Hertz wave has a wavelength that is 186,000 miles long, A 10 Hz wave is 18,600 miles long, etc. Radio-waves move at the speed of light (186,000 miles per second)]

### **HAARP**

The Creator designed living beings to resonate to the 11 natural Schumann Resonance frequency pulsation in order to evolve harmoniously. The Ionosphere is being manipulated by US government scientists using the Alaskan transmitter called HAARP, (High-Frequency Active Auroral Research Program) which sends focused radiated power to heat up sections of the ionosphere, which bounces power down again. ELF waves produced from HAARP, when targeted on selected areas, can *weather-engineer and create mood changes* affecting millions of people. The intended wattage is **1,700 billion watts** of power.

## Geomagnetic Waves & GWEN

Sixty four elements in the ground modulate, with variation, the geomagnetic waves naturally coming from the ground. The earth's natural 'brain rhythm' above is balanced with these. These are the same minerals found in red blood corpuscles. There is a relation between the blood and geomagnetic waves. An imbalance between Schumann and geomagnetic waves disrupts these biorhythms. These natural geomagnetic waves are being replaced by artificially created low frequency (LF) ground waves coming from GWEN Towers.

GWEN (Ground Wave Emergency Network) transmitters placed 200 miles apart across the USA allow specific frequencies to be tailored to the geomagnetic-field strength in each area, allowing the magnetic field to be altered. They operate in the LF range, with transmissions between LF 150 and 175 KHz. They also emit waves from the upper VHF to the lower UHF range of 225 - 400 MHz. The LF signals travel by waves that hug the ground rather than radiating into the atmosphere. A GWEN station transmits in a 360 degree circle up to 300 miles, the signal dropping off sharply with distance. The entire GWEN system consists of, (depending on source of data), from 58 to an intended 300 transmitters spread across the USA, each with a tower 299-500 ft high. 300 ft copper wires in spoke-like fashion fan out from the base of the system underground, interacting with the earth, like a thin shelled conductor, radiating radio wave energy for very long distances through the ground.

The United States is bathed in this magnetic field which can rise from ground up to 500 ft, but goes down into basements, so everyone can be affected and mind-controlled. The entire artificial ground-wave spreads out over the whole of the USA like a web. It is easier to mind-control and hypnotize people who are bathed in an artificial electromagnetic-wave.

GWEN transmitters have many different functions including:

1. **controlling the weather,**
2. **mind control,**
3. **behavior and mood control,** and
4. sending **synthetic-telepathy as infrasound to victims with US government mind-control implants.**

GWEN works in conjunction with HAARP and the Russian Woodpecker transmitter, which is similar to HAARP. The Russians openly market a small version of their weather-engineering system called *Elate*, which can fine-tune weather patterns over a 200 mile area and have the same range as the GWEN unit. An Elate system operates at Moscow airport. The GWEN towers shoot enormous bursts of energy into the atmosphere in conjunction with HAARP. The website [www.cuttingedge.org](http://www.cuttingedge.org) wrote an expose of how the major floods of the Mid-West USA occurred in 1993.

## Atmospheric Vapor Rivers

Enormous, invisible rivers of water, consisting of vapors that flow, move towards the poles in

the lower atmosphere. They rival the flow of the Amazon River and are 420 to 480 miles wide and up to 4,800 miles long. They are 1.9 miles above the earth and contain a volume of water equivalent to 340 lbs of water per second. There are 5 atmospheric rivers in each Hemisphere. A massive flood can be created by damming up one of these massive vapor rivers, causing huge amounts of rainfall to be dumped. The GWEN Towers positioned along the areas north of the Missouri and Mississippi Rivers were turned on for 40 days and 40 nights, probably mocking the Flood of Genesis. (This was in conjunction with HAARP, that creates a river of electricity flowing thousands of miles through the sky and down to the polar ice-cap, manipulating the jet-stream, like the Russian Woodpecker.) These rivers flooded, causing agricultural losses of \$12-15 billion. HAARP produces earthquakes by focusing energy along fault lines. GWEN Towers are located on the fault lines and volcanic areas of the Pacific Northeast.

In 1963, **Dr Robert Beck** explored effects of external magnetic-fields on brainwaves showing a relationship between psychiatric admissions and solar magnetic storms. He exposed volunteers to pulsed magnetic-fields similar to magnetic-storms, and found a similar response. US 60 Hz electric power ELF waves vibrate at the same frequency as the human brain. UK 50 Hz electricity emissions depress the thyroid gland.

### **Human Vulnerability**

**Dr Andrija Puharich** in the 50's/60's, found that clairvoyant's brainwaves became 8 Hz when their psychic powers were operative. He saw an Indian Yogi in 1956 controlling his brainwaves, deliberately shifting his consciousness from one level to another. Puharich trained people with bio-feedback to do this consciously, making 8 Hz waves. A healer made 8 Hz waves pass into a patient, healing their heart trouble, her brain emitting 8 Hz . One person emitting a certain frequency can make another also resonate to the same frequency. Our brains are extremely vulnerable to any technology which sends out ELF waves, because they immediately start resonating to the outside signal by a kind of tuning-fork effect. Puharich experimented discovering that:

- A) **7.83 Hz** (earth's pulse rate) made a person feel good, producing an altered-state.
- B) **10.80 Hz** causes riotous behaviour and
- C) **6.6 Hz** causes depression.

Puharich made ELF waves change RNA and DNA, breaking hydrogen bonds to make a person have a higher vibratory rate. He wanted to go beyond the psychic 8 Hz brainwave and attract psi phenomena. **James Hurtak**, who once worked for Puharich, also wrote in his book '*The Keys of Enoch*' that ultra-violet caused hydrogen bonds to break and this raised the vibratory rate. **Puharich presented the mental effects of ELF waves to military leaders**, but they would not believe him. He gave this information to certain dignitaries of other Western nations. The US government burned down his home in New York to shut him up and he fled to Mexico. However, the Russians discovered which ELF frequencies did what to the human brain and began zapping the US Embassy in Moscow on 4 July 1976 with electromagnetic-waves, varying the signal, including focusing on **10 Hz**. (10 Hz puts people into a hypnotic state. Russians and

North Koreans use this in portable mind-control machines to extract confessions. A machine was even found in an American church to help the congregation believe!) The Russian "Woodpecker" signal was traveling across the world from a transmitter near Kiev. The US Air Force identified 5 different frequencies in this compound harmonic Woodpecker signal that was sending signals through the earth and the atmosphere.

Nikola Tesla revealed in 1901 power could be transmitted through the ground using ELF waves. Nothing stops or weakens these signals. The Russians retrieved Tesla's papers when they were finally returned to Yugoslavia after his death.

Puharich continued to monitor the Russian ELF wave signal while in Mexico and the **higher harmonics produced in the MHz range** (5.340 MHz). He met the CIA and started working for them. **He and Dr. Robert Beck designed equipment to measure these waves and their effect on the human brain.** Puharich started his work by putting dogs to sleep. By 1948/49 he graduated to monkeys, deliberately destroying their eardrums to enable them to pick up sounds without the eardrum intact. He discovered a nerve in the tongue could be used to facilitate hearing. He created the **dental tooth implant** which mind-control victims are now claiming was surreptitiously placed in their mouth by controlled dentists **causing them to hear 'voices in their head.'** The implant was placed under dental caps or lodged in the jaw.

### **Vaccine Implants**

**Implants** are now smaller than a hair's width and are injected with vaccine and flu shots. **Millions have had this done unknowingly.** These 'biochips' circulate in the bloodstream and lodge in the brain, enabling the victims to hear 'voices' via the implant. There are many kinds of implants now and 1 in 40 are victims from 'alien abduction' statistics, though 1 in 20 has also been gauged. The fake alien abduction event, revealed to be actually the work of US military personnel using technology to make hologram spaceships outside, virtual reality scenarios of going onto a spaceship with humans in costumes, has been astutely perceived. Though real alien abductions do occur, the 'alien abduction' scenario has been useful to stop any further investigation or accountability of government authorities by poor victims who would face mockery and appear silly.

Are we being forced to respond to an artificially induced vibratory rate by global masters who want this planet to have a sudden leap in evolution, populated by the psychically aware and therefore a superior class of humans or is the agenda designed to eliminate billions of people who are 'useless eaters', deceptively being disposed by electro magnetically-induced cancers and diseases?

### **Electromagnetic Disease Transmission, ELF, & Chemtrails**

The physics and engineering behind electromagnetic disease transmission are frightening. Diseases can be reproduced as 'disease signatures' in that the vibration of a disease can be manufactured and sent on to be induced. (The brainwave pattern of hallucinogenic drugs can

also be copied and sent by ELF waves to induce 'visions'.) Once diseases are sprayed in the air, electromagnetic-waves attuned to the disease, using harmonics and subharmonics, will make them more lethal and infectious by sending particular disease frequency death-patterns. Chemtrails are being sprayed daily all over USA (and other countries too) in a white crisscross pattern. They contain diseases and chemicals which affect our state of consciousness. They can produce apathy which works in conjunction with fluoridation of the water, as well as aspartame and drugs. **Fluoride disables the willpower section of the brain**, impairing the left occipital lobe.

Fluoride and selenium enable people to 'hear voices'. ELF waves create disturbances in the biological processes of the body and these can be activated in the population once the diseases are introduced into the body from the chemtrails. Some chemtrails have been analyzed and shown to be creating cleavages in spacial perceptions, blocking the interaction of various amino-acids that relate to higher-consciousness and to increase dopamine in the brain producing a listless, spaced-out state of lower reactive mind.

Basically, **the goal is to fog the difference between the real and unreal** and some of this could be connected with the many UFO abductions occurring en-mass. Hundreds have been witnessed laid out on tables and implanted. Intelligence agencies are in league with each other behind this disablement of the masses to such a point that they can't even fight back. In order for the perpetrators to do what they want, they need the overall 'frequency' of each victim to function at a specific rate below the threshold of awareness.

Could this be part of a greater plan with mind-control transmitters covering the whole of USA and England, cleverly disguised as cell phone towers and trees? The power from microwave towers may be turned up to such a level that people can die.

A brain functioning at beta-level (above 13 Hz) is agitated and can't change its perceptions, if it is artificially maintained by technology to that frequency. This may increase body electricity in others, giving them psychic powers. Is this linked to the New-Agers claim of a rising 12-14 Hz Schumann Resonance, inching us towards the 4th dimension? Stimulants ingested globally from caffeine genetically-modified plants, may also produce an impact on the 'global-brain' in the ionosphere collecting our brainwaves. New-age channellers say we are going into 4th dimensional frequency. They 'heard' the voice of some 'ET' who told them.

However, some 'ETs' may be local boys. Voices in the head were produced in prisoners in Utah prisons using Tesla technology. Each of the prisoners received the *same* message from an 'ET'. Today, it seems, it's easy to produce 'voices in the head' without implants.

A prisoner called David Fratus in Draper Prison, Utah in 1988 wrote:

*"I began to receive, or hear, high-frequency tones in my ears. When I plug my ears..the tones are still inside and become amplified. It's as if they had become electrified echo chambers with the sounds coming from the inside out..I began to hear voices..into my inner ears as vivid as though I were listening to a set of stereo headphones..with the end result being that I am now having*

*my brain monitored by an omnipotent computerized mind reading or scanning machine of some sort "*

Hundreds of inmates at the Gunnison Facility of the Utah State Prison, and the State Hospital were subject to this brand of mind-control in order to test it. In the early 1970s, this was brought out in the Utah U.S. District Court, because inmates who had been subjected to this Tesla-wave mind-control in prison had tried unsuccessfully to fight back in court. The University of Utah researched how Tesla-waves could be used to manipulate the mind into hearing voices, overriding and implanting thoughts into the mind, and reading the thoughts, as well as developing eye-implants.

### **Tracking**

Cray computers, using artificial-intelligence, monitor the victims of government implants sending pre-recorded sound-bytes or occasional live messages. They are picked up by satellite and relayed to whatever large TV broadcasting antenna, GWEN tower or other microwave antenna is near the victim. It's believed that some type of body implants pick up the signal and broadcast the correct Tesla-wave pattern to create voices within the victim.

The tracking implant keeps the staff and the satellite system informed every few minutes as to exactly where to send the voice signals. The master computer and central HQ for this is reported to be in Boulder, CO. It is thought that transponders are being made there as well. The central cellular computer is in the Boulder, CO *National Bureau of Standards* building. AT&T is also cooperating in this project. Several government agencies work together on this.

Tim Rifat of UK wrote that:

*"this inter-cerebral hearing is used to drive the victim mad, as no one else can hear the voices transmitted into the brain of the target. Transmission of auditory data directly into the target's brains using microwave carrier beams is now common practice. Instead of using excitation potentials, one uses a transducer to modify the spoken word into ELF audiograms, that are then superimposed on a pulse modulated microwave beam."*

The *Sydney Morning Herald* on 21 March 1983 published an article by Dr Nassim Abd El-Aziz Neweigy, Assistant Professor in the Faculty of Agriculture, Moshtohor Tukh-Kalubia, Egypt. It stated:

*"Russian satellites, controlled by advanced computers, can send voices in one's own language interweaving into natural thoughts to the population of choice to form diffused artificial thought. The chemistry and electricity of the human brain can be manipulated by satellite and even suicide can be induced. Through ferocious anti-humanitarian means, the extremist groups are fabricated, the troubles and bloody disturbances are instigated by advanced tele-means via Russian satellites, in many countries in Asia, Africa, Europe and Latin America."*

Another source says that these have been fed with the world's languages and synthetic telepathy will reach into people's heads making people believe God is speaking to them personally to enact the Second Coming, complete with holograms! The Russians broke the

genetic code of the human brain. They worked out 23 EEG band-wave lengths, 11 of which were totally independent. So if you can manipulate those 11, you can do anything.

NSA Cray computers can remotely track people just knowing the specific EMF waves (evoked potentials from EEGs in the 30-50 Hz, 5 milliwatt range) of a person's bioelectric-field. Each person's emissions are unique and they can remotely track someone in public.

### **Maxwell's 'Hidden' Etheric Component**

Evoked-potentials officially don't exist in physics, but in 1873 a Scotsman, James Clerk Maxwell, discovered electromagnetic waves have 3 components:

He discovered waveforms which exist at a certain number of right-angled rotations away from the electromagnetic-field. *These are hyperspatial components, not subject to constraints of time and space.* He claimed that electromagnetic-radiation waves were carried by the **ether** and the ether was disturbed by magnetic lines of force. The hidden component is called only 'potential' now and not normally used except for covert hyperdimensional physics and to manipulate consciousness itself via electromagnetic-waves covering vast areas of the planet.

Approx. one person in 3000 is naturally sensitive to this magnetic-waveform component, the telepathic types (according to a writer called "Majix"), but we are all capable of tuning into this magnetic component by tuning our subconscious to it. Maxwell's successors thought potentials were akin to mysticism, because they believed fields contain mass which cannot be created from apparently nothing, which is what potentials are, both literally and mathematically - they are an accumulation or reservoir of energy; but this hasn't been taught in mainstream physics.

### **Thought Control**

Subliminal words in the correct electromagnetic-field that expresses human consciousness, attuned to the human brain, can enter our minds at a subconscious level. Our brain activity patterns can apparently be measured and stored on computer by super-computers. If a victim needs subliminal-thoughts implanted, all that is necessary is to capture, save on computer, and target the person's brainwave pattern to send them such low frequency subliminal-messages that they actually think it is their own thoughts [confirmed by Al Bielek and Preston Nichols with the Montauk Project in Long Island]. The researcher Majix says our brains are so sensitive that they are like liquid-crystal in response to the magnetic component of the earth.

We are sensitive to earth's magnetic changes, changes in the ionospheric cavity and re-resonate those frequencies ourselves. We are incredibly complex, beyond comprehension and a type of biocosmic transducer. He adds:

*"Physicists in Russia correlate the mean annual magnetic-activity, electro-magnetic and electro-static fields on human behavior and medical indications. They are similar to biorhythms. These magnetic frequencies can be manipulated. Our brain waves can mimic magnetic frequencies from very simple equipment at extremely low power levels. From half a second to 4 seconds later, the neurons and brainwaves are driven exclusively by the device, with power levels almost nonexistent. All one needs is a circularly polarized antenna aimed up at the ionospheric cavity*

*and they can manipulate the moods of everyone within a 75 sq. mile area. The body picks up these "new" manipulated waves and begins to correspond immediately. "Sleep" frequency will make everyone become tired and sleep."*

In 1967, an "internationally renowned scientist" and Christopher Hills, a pendulum expert, communicated with some ETs. (It is not known who the scientist was, but at one time both Hills and Puharich were with the medium Eileen Garrett at a time when Puharich was communicating with ETs.)

In short, ETs communicated with us via modulated radio-waves, between 10,000 and 20,000 cycles below the known electromagnetic-spectrum. In the carrier-wave by amplitude modulation, mixed with frequency modulation. Single band energy, transmission power less than 25 watts. A naturally present wave on earth, the brain modulated - a wave that resonates between the earth and the ionosphere. All humans influence the ionosphere in this manner. A reflecting technique is involved. The brain modulation consisted of pulses, akin to those known from neuro pulses. Two humans can use this. It's related to something akin to low frequency radar and to ultrasonic techniques, but qualified. A mixed electro-acoustic wave function. The electromagnetic-wave induced an ultrasonic transduction in human tissue. The brain radiation has a sonic component to it as well as an electromagnetic component. Electromagnetic-radiation has a sonic component and it's dependent on the medium through which it travels.

The scientist cut through months of work. Now HAARP is slicing up the ionosphere, the world-brain, like a microwave knife, producing long tear incisions destroying the membrane which holds the reservoir of data accumulated by all earth's history. A healer called Mr. "A" claimed to receive "Ancient Wisdom" from this protective Magnetic-Ring of energy which stores within it all knowledge since time began. Ruth Montgomery wrote about him in *Born To Heal*. He claimed that if our energy flow is cut off from this magnetic-field, the Universal-Supply is obstructed and we are no longer in tune and start to get sick. The Power from this travels in split-seconds around the world and is available to anyone who is capable of receiving it and handling it. The waves from The Ring automatically translated into words in his mind, as wisdom to diagnose and heal others, coming from the storehouse of knowledge here since the beginning of time. He produced instant miracles, knitting broken bones and removing arthritis. A photo caught forked lightning coming from his fingers.

In *Let's Talk MONTAUK*, **Joyce Murphy** shows that experiments on the **410-420 MHz** cycle have been done which could affect the "window frequency to the human consciousness" as a whole: *"He (Preston Nichols) used his..radio equipment to learn that whenever a 410-420 MHz signal appeared on the air, the psychic's minds would be "jammed." Tracing the signal to Montauk Point and the red and white radar antenna on the Air Force Base.."*

In *Encounter in the Pleiades* by Peter Moon and Preston Nichols, <http://www.time-travel.com/skybooks/> Preston wrote that:

*"Dr. Nicholas Begich has picked up 435 MHz signals connected to HAARP and that a mind control function is being employed. He says that 400-450 MHz is the window to human consciousness because it is our reality's background frequency."*

Tim Rifat wrote in his *Microwave Mind Control* in the UK article <http://www.brazilboycott.org/> that cellular phones use 435 MHz. UK police use 450 MHz exclusively. **Dr. Ross Adey** used this for CIA behavioral modification experiments. Police have a vast array of antennae to broadcast this frequency all over the UK. Adey used 0.75mW/cm<sup>2</sup> intensity of pulse modulate microwave at a frequency of 450 MHz, with an ELF modulation to control all aspects of human behavior. 450 MHz radar modulated at 60 Hz greatly reduced T-lymphocyte activity to kill cultured cancer cells. A study of USA 60 Hz powerlines repeated this finding.

Blessings,

Pastor Bob, [EvanTeachr@aol.com](mailto:EvanTeachr@aol.com)
