

There Are No “Statute of Limitations” On FRAUD!

Part 2

I love this picture of President Trump at his desk in the Oval Office of the White House. This picture speaks volumes about what this series reveals about our earthly future, but more importantly, our children and our grandchildren’s future. We have lived under such tyranny since 1913 but few know much about it, and perhaps even fewer cared to study the history, and the events that led to our enslavement. Moreover, much of the detail has been kept hidden for years. One day soon, this man, who has been so maligned and belittled by those who hate this country, foreign and domestic will be applauded for his unswerving course to restore the Rule of Law to this land. I might add that the greatest form of enslavement is when people believe they are free!

We certainly could say Trump’s past contains skeletons but whose past doesn’t. He has been through six business bankruptcies, two divorces, and there have been numerous scandals about his past personal life, which includes law suits, and whatever else could be drug out of the closet. All that aside, this man will become America’s greatest president

Part 1 was in the proofing stage when I received a second report from the “All News Pipeline” an alternative news website. Rather than tack it onto the tail end of Part 1, I decided to

include it with Part 2. This article is extremely important in the fast-paced moving events that will ultimately lead to the “**Nationalization**” of the Federal Reserve System, the end of the I.R.S., the WTO, and the IMF.

But what people do not understand is that a Rothschild-owned or controlled Central Bank leads to ultimate enslavement, since a nation can never pay off the debt-created system. Sooner or later the debt rises to a level that the interest on that debt becomes unsustainable. In 105 years of the Federal Reserve System, we have been **fraudulently** enslaved to the House of Rothschild. In five years or by 2023, the interest on the National Debt will be larger than the entire budget of the U.S. military, over \$700-billion dollars. President Donald Trump knew that fact before he agreed to sign the budget last year and this year. Why, you might ask would President Trump do that?

First you need to understand how compound interest works. Did you ever have a math teacher present this question to you in school: Would You Rather Have A Penny That Doubles Each Day For a Month Or \$1 Million? What would you choose? The fact is a lot of people get caught up in the initial amounts: \$1,000,000.00 versus \$0.01. If you took a single penny and doubled it every day, by day 30, you would have **\$5,368,709.12**. Are you beginning to see what I am driving at?

The Federal Reserve System is a House of Rothschild-owned entity, through (originally it was 12 banks, but presently, it numbers just 10) Rothschild banks; all but one is headquartered in Europe. JPMorgan-Chase today is headquartered in Chicago, IL. The House of Rothschild only does business with sovereign states (nations), (no personal loans or deposits are for less than \$1-million). Only the rate of interest and compounding terms will vary from my example above.

However, when the Vatican commissioned the House of Rothschild as their “**Fiduciary**” Agents in 1823/24, they conducted business at a rate of 6% interest compounded annually. In fact, two decades earlier, the pope had to borrow from the Rothschild’s. In Part 1, I noted that since the Bible condemned usury, the Vatican had a problem, a huge problem, for which they solved by simply franchising the money-lending business to the Jews. The Vatican is all about money as any Catholic will tell you. In many ways, you could also say that about any existing religious belief system, but my point deals mainly with the world’s “recognized” voice of the church. That term: “**Fiduciary**” Agents is the crux of the global financial system.

It carries the legal weight of being much more than a “Power of Attorney”. A “**Fiduciary**” Agent is supposed to “increase” the value of his client’s assets. Jesus used “*The Parable of the Talents*” in Matthew 25:14-30 as an illustration of how his followers were to live in relationship to the Message of the Good News! People often misunderstand this parable as an instruction to go and make lots of money. It’s not, but Jesus focused His teaching by using it as an illustration for something else that He had in mind. Jesus knew all about the money-lenders, everything!

Financially speaking, the Vatican and the House of Rothschild have been like “Siamese” twins, being that they are joined at the hip pocket, pun intended. The profit split has been roughly 60/40 since 1823/24. It seems that the relationship has worked out quite satisfactorily for both the Vatican and Rothschild’s, which now has been going on for almost two centuries. So now that

you understand the matter of “compound interest”, you will see what President Trump is trying to bring down. President Trump has a top-drawer quality team from what I have been able to deduce, by covering the “Q” posts and drops since October of 2017.

So far, for the fiscal year of 2018, the United States has paid **\$523,017,301,446.12** in interest on the National Debt, just to service the interest due! Not a single dollar, not one, went toward the borrowed principal. That has been the case since 1914. It reminds me of a church I pastored here in Kentucky in 1998. Six months before I was appointed pastor, the church had bought a Ford 15-passenger van for the children’s choir and youth program. Ten months into my new appointment, I learned the church had not made a payment on the Bank Note since they purchased it. My youth pastor did not know it either and he used the van almost daily. For those of you who can’t interpret numbers this is representative of the **\$523-Billion** dollars paid out in interest by the US for just fiscal 2018. I should note that this is through the fiscal year which ended September 30th. This amount paid was approximately **\$80-billion above** the previous fiscal year which ran from October 1st, 2016 to September 30th, 2017. The bottom line of this little math lesson is this: The National Debt will never be paid off, it simply is impossible! The compounding of interest, regardless of the rate, even if it was as low as .01%, precludes it from ever paying down the National Debt. You can verify my figures here for the U.S. debt-service payments by going to the web site:

https://treasurydirect.gov/govt/reports/ir/ir_expense.htm

If you were President Trump sitting in the Oval Office, thinking about President Andrew Jackson’s portrait on the wall to his left (“the president of the common people”), imagine the questions that goes through his mind every day. President Trump has been through business bankruptcy numerous times (six to be exact), and has to be thinking, why not file national bankruptcy; or a few other alternatives I see as options he could choose from, by simply taking down the Federal Reserve System. He has to be thinking how that **\$523,017,301,446.12** could have been better spent than to give it to the Vatican and the House of Rothschild. If my mental math is correct that works out to around \$1,600 and change, per person, for this past fiscal year. The population is stated to be at 326-million at present. The title of this series holds the answer for the President. Along with the power of the Presidential Directive or Executive Order, President Trump is authorized as the Nation’s Chief Executive Officer to Zero-out the Rothschild Federal Reserve System, and return to what the Constitution designated as authorized under the Constitution. You will find further explanation close to the end of this segment of how this can be wiped out, and have a fresh start, which is the intended purpose of the bankruptcy laws.

“We the People” are being robbed daily through taxes and inflation. The window sticker of my first car, a 1960 Ford Fairlane, was \$3,507. That same identical car today would cost \$29,801, a 751.5% rate of inflation! I may be able to beat the IRS taxes, but no one can beat the inflation rate, a hidden tax for all intent and purpose!

The Federal Reserve System is trying to destroy the U.S. Dollar and President Trump is allowing the Federal Reserve to destroy itself in the process. What matters to both in this struggle is who controls the narrative with the American public. If you follow his public remarks, President Trump is attacking the Federal Reserve for stifling the Trump Economy. For months now, almost

daily, in fact, President Trump excoriates the Fed and its chairman Stanley Fisher. In 2018, President Trump was reported at (CNSNews.com) - During a speech in Richfield, Ohio, located between Cleveland and Akron. President Donald Trump said his administration has delivered on its promises, created 3 million jobs and eliminated job-killing regulations.

"We're keeping our promises, and the results are in: 3 million new jobs since Election Day - 3 million. And if I would have said that to you during the campaign, where we had tremendous support in this great state, state of Ohio, if I would have said, 3 million jobs, they would have said-- the fake news -- he's exaggerating," he said.

"Unemployment claims are at their lowest level in 45 years - 45 years. African-American unemployment has reached the lowest level ever recorded. Remember? Remember I said, 'what do you have to lose?' What do you have to lose? And I'm so happy about that," Trump said.

"Hispanic-American unemployment rate has also reached the lowest levels ever recorded, and wages are rising at the fastest level ever in a decade. Finally - 19 years, 21 years. People were making, last year were making less money than they made 20 years ago. Now wages are rising, because more jobs are happening," the president said.

He said because of his administration's efforts to protect and grow American jobs, plants and factories are "pouring back into the country." He mentioned Apple's \$350 billion investment in the economy through capital expenditures in the U.S. over the next five years.

Apple made the announcement in January, saying it would also be creating 20,000 new jobs in addition to its existing 84,000 jobs in the U.S.

"Apple, already the largest US taxpayer, anticipates repatriation tax payments of approximately \$38 billion as required by recent changes to the tax law. A payment of that size would likely be the largest of its kind ever made," the company said on its website.

"They can't come back fast enough, even if you look, Apple is gonna invest \$350 billion. When I heard \$350 billion, I said you must mean \$350 million. That's still a big plant, but they're going to be investing \$350 billion. So many others coming back with massive amounts of money. They all want to be back in the USA," Trump said.

"A lot of them left. They're coming back. We've eliminated a record number of job killing regulations. That's one of the reasons they're coming back. And we're not finished yet." he said. "In some cases, you have statutory limitations where you have to go 30 days and wait, and then you have to go 90 days and wait, and then you have to go 15 days and wait and then you go 90 days again, and then you know what happens? We killed the regulation, and it's a thing of beauty," Trump said.

"And we have filled out every form, every legal application, and still actually have a long way to go on regulation, and we're gonna have regulations. You need regulations for safety and the

environment, but not where you couldn't do anything, you couldn't move. So I think that's been a big, big success, and a reason for our success," he added.

While President Trump is "trumpeting" his positive economic numbers, the Fed is tightening the screws on the economy by raising interest rates. The Fed will justify their rate increases as a measure to cool inflation. President Trump is going to bring down the Fed by using their own policy to achieve his "PLAN".

In June, the Federal Reserve hiked its benchmark short-term interest rate a quarter percentage point and indicated that two more increases are likely this year, 2018. The move pushes the funds rate target from 1.75 percent to 2 percent. The rate is closely tied to consumer debt, particularly credit cards, home equity lines of credit and other adjustable-rate instruments. With credit card rates as high as 18-22%, many people who pay the minimum payment on their statement are being hammered like a 10-penny nail with a 32-ounce hammer.

In an unusually terse statement that ran just 320 words, the Federal Open Market Committee changed multiple phrases from its previous missives, pointing to a more optimistic view on economic growth and higher inflation expectations. Though the statement contained less than half the words of some of the committee's typical communiqués, there was a lot to unpack in the language.

The committee said economic growth has been "rising at a solid rate," an upgrade from "moderate" in May. The unemployment rate has "declined," as opposed to "stayed low," and household spending "has picked up," an upgrade from "moderated." With that in mind, the committee said two more rate hikes were appropriate, bringing the 2018 total to four increases. Its first hike this year was in March. The Fed has three more hikes planned for 2019!

"The Committee expects that further gradual increases in the target range for the federal funds rate will be consistent with sustained expansion of economic activity, strong labor market conditions, and inflation near the Committee's symmetric 2 percent objective over the medium term," the statement said.

That sentence itself featured multiple instances of more hawkish language. The committee previously had characterized rate hikes as "gradual adjustments" rather than "increases," and the "sustained expansion" portion was completely new.

However, the statement twice retained language that the Fed had a "symmetric" 2 percent inflation target, indicating a tendency to let price pressures run a little hot before putting the clamps on growth. With the 0.25 percentage point increase already priced in, financial markets were looking for how aggressive the FOMC (Federal Open Market Committee) would be in setting monetary policy for the rest of the year.

Markets had been waffling over expectations for a fourth rate hike this year — the FOMC also increased the funds rate target in March — and prior to the meeting were pricing in a 46.5 percent change. The latest projections from committee members indicate the funds rate to rise to

2.4 percent by the end of the year, a 0.3 percentage point increase from the March forecast. Stocks edged lower after the FOMC release while government bond yields nudged higher.

"They telegraphed it. The only incremental surprise is just that they now expect four rate hikes, and I suppose that's why the market is a little weaker on that news," said Andrew Slimmon, senior portfolio manager at Morgan Stanley Investment Management. *"That accelerates the move from the Fed's being neutral to more restrictive."*

Committee members indicated in the update to their quarterly economic forecast that they expected core inflation to reach the Fed's 2 percent target by the end of the year, and now see economic growth hitting 2.8 percent for the full year.

Both the expectations for gross domestic product and personal consumption reflected a 0.1 percentage point increase from the last estimates in March and were enough to push the so-called dot plot of individual committee member rate expectations to a more aggressive position. Three committee members moved their expectations higher for rates.

In addition to the upward projections for GDP and inflation, committee members also cut their forecast for unemployment. They now see a 3.6 percent rate by year's end, compared with the current 3.8 percent, which was the full-year projection in March.

The committee also indicated it continues to expect three more rate hikes in 2019, even with the fourth one this year.

Despite the added hike, officials still see the long-run funds rate at 2.9 percent after peaking at 3.4 percent in 2020. The extra hike, though, pushes the rate past "neutral" in 2019, a little sooner than anticipated. They still see GDP rising 2.4 percent in 2019 and 2 percent the year after, and longer-range growth at 1.8 percent.

The headline inflation forecast, which includes food and energy, rose one-tenth of a point to 2.1 percent in 2019 and stayed at that level for the following year. Headline inflation projections also stayed at 2.1 percent for 2019 and 2020.

What you need to know is that these rates are what banks have to pay to borrow funds at the Fed's Open Market Window. They are the rates charged to bank customers, government agencies, corporations, small businesses, and individuals. The rate increase impacts everything from construction loans to credit card rates.

Changes in interest rates can have both positive and negative effects on the U.S. markets. When the Federal Reserve Board (the Fed) changes the rate at which banks borrow money, this has a ripple effect across the entire economy. Below, we will examine how interest rates can have an effect on the economy as a whole, the stock and bond markets, inflation and recessions.

With every loan, there is a possibility that the borrower will not repay the money. To compensate lenders for that risk, there must be a reward: interest. Interest is the amount of

money that lenders earn when they make a loan that the borrower repays, and the interest rate is the percentage of the loan amount that the lender charges to lend money.

The existence of interest allows borrowers to spend money immediately, instead of waiting to save the money to make a purchase. The lower the interest rate, the more willing people are to borrow money to make big purchases, such as houses or cars. When consumers pay less in interest, this gives them more money to spend, which can create a ripple effect of increased spending throughout the economy. Businesses and farmers also benefit from lower interest rates, as it encourages them to make large equipment purchases due to the low cost of borrowing. This creates a situation where output and productivity increase.

Conversely, higher interest rates mean that consumers don't have as much disposable income and must cut back on spending. When higher interest rates are coupled with increased lending standards, banks make fewer loans. This affects not only consumers but also businesses and farmers, who cut back on spending for new equipment, thus slowing productivity or reducing the number of employees. The tighter lending standards also mean that consumers will cut back on spending, and this will affect many businesses' bottom lines.

Whenever interest rates are rising or falling, you commonly hear about the federal funds rate. This is the rate that banks use to lend each other money. It can change daily, and because this rate's movement affects all other loan rates, it is used as an indicator to show whether interest rates are rising or falling. These changes can affect both inflation and recessions. Inflation refers to the rise in the price of goods and services over time. It is the result of a strong and healthy economy. However, if inflation is left unchecked, it can lead to a significant loss of purchasing power. These "basis" points may seem minor; however, they have profound impact upon the national economy.

Why is all of this so important, when we are talking a quarter-point one way or the other? The Federal Reserve System creates money out of thin air, and loans digits on a computer spread sheet. If the borrower, for whatever reason, should be unable to pay their loan back, (this happens more frequently than not) they may have real assets such as real estate, buildings, equipment, vehicles, inventory, which can be repossessed by the bank. This is what happened to me. My home was pledged as collateral on my \$100,000 business loan. My home was appraised and insured for \$205,000 in 1987. It was foreclosed upon by my bank for \$5,400 + \$2,800 in property and school taxes. In my case, delinquent property and school taxes had gone into second year delinquency.

Here is the sucker punch to this fractional-reserve banking scam. The bank loaned me digits on a computer spread sheet, they did not make that money, they created it out of nothing but paper and interest rate book, but when they foreclosed on my delinquent note, they took possession of a 'real' physical asset, a 10-room, 2,540-square-foot brick exterior, house built with my own, four years of sweat equity, to build it to my specifications!

Today, I get some comfort from this personal loss by the fact that the government will never be able to collect on my seminary student loans. At the end of 1996, my \$32,000 student

loans had accrued to over \$72,000 in principal, interest, and penalties, as we go into the new year of 2019. How that came about is a long story and has no relevance here. I am allowed to keep \$750.00 of my Social Security and anything over \$750 is kept by the government and applied toward the interest on my student loans. Should I feel guilty? I don't and those who know me know I don't complain. "Mystery Babylon" has blown \$22-trillion dollars on endless wars and its military cannot account for another \$21-trillion; this is a figure that was revealed by a 2018 audit of the DoD. Dr. Mark Skidmore of Michigan State University and his graduate students analyzed the appropriate government documents to reveal how much has been stolen from "We the People!" President Trump, despite his faults, real and imagined, will one day be considered to be the greatest president of the USA, depending on the success of his "PLAN"

To help keep inflation manageable, the Fed watches inflation indicators such as the Consumer Price Index (CPI) and the Producer Price Index (PPI). When these indicators start to raise more than 2-3% a year, the Fed will raise the federal funds rate to keep the rising prices under control. Because higher interest rates mean higher borrowing costs, people will eventually start spending less. The demand for goods and services will then drop, which will cause inflation to fall.

A good example of this occurred between 1981 and 1982. Inflation was at 14% a year, and the Fed raised interest rates to 20%. This caused a severe recession in the land, but it did put an end to the spiraling inflation that the country was seeing. Conversely, falling interest rates can cause recessions to end. When the Fed lowers the federal funds rate, borrowing money becomes cheaper; this entices people to start spending again. In 1979, I borrowed \$100,000 to purchase business equipment, using my home as collateral for the bank loan. Loans of this type are almost always variable or adjustable-rate interest, meaning that the interest rate rises or falls depending on what the Fed rate is at. At the highest point, I was paying 21.5% on an adjustable-rate loan. It was killing me to meet my monthly interest due, and this was not factoring in the principal. On several months I was unable to make a single dollar on the principal.

Another good example of when the Fed lowers the discount rate occurred from 2001 to 2002, when the Fed cut the federal funds rate to 1.25%. This greatly contributed to the economy's 2003 recovery. By raising and lowering the federal funds rate, the Fed can prevent runaway inflation and lessen the severity of recessions.

Investors have a wide variety of investment options. When comparing the average dividend yield on a blue-chip stock to the interest rate on a certificate of deposit (CD) or the yield on a U.S. Treasury bond (T-bonds), investors will often choose the option that provides the highest rate of return. The current federal funds rate tends to determine how investors will invest their money because the returns on both CDs and T-bonds are affected by this rate. This was a major factor in the long rise of the stock market the past few years.

Rising or falling interest rates also affect consumer and business psychology. When interest rates are rising, both businesses and consumers will cut back on spending. This will cause earnings to fall and stock prices to drop. On the other hand, when interest rates have fallen significantly, consumers and businesses will increase spending, causing stock prices to rise.

Interest rates also affect bond prices. There is an inverse relationship between bond prices and interest rates, meaning that as interest rates rise, bond prices fall, and as interest rates fall, bond prices rise. The longer the maturity of the bond, the more it will fluctuate in relation to interest rates. A couple months ago saw the yield curve invert on 2 and 10-year bonds. That means those holding 10-year maturity bonds earned considerably less than those holding onto a 2-year bond. When the interest rate on a yield curve inverts, it is a predictor of major economic collapse.

One way that governments and businesses raise money is through the sale of bonds. As interest rates move up, the cost of borrowing becomes more expensive. This means that demand for lower-yield bonds will drop, causing their price to drop. As interest rates fall, it becomes easier to borrow money, and many companies will issue new bonds to finance expansion. This will cause the demand for higher-yielding bonds to increase, forcing bond prices higher. Issuers of callable bonds may choose to refinance by calling in their existing bonds so they can lock in a lower interest rate.

Interest rates affect the economy by influencing stock and bond interest rates, consumer and business spending, inflation, and recessions. However, it is important to understand that there is generally an 8-12-month lag in the economy, meaning that it will take at least 8-12 months for the effects of any increase or decrease in interest rates to be felt. By adjusting the federal funds rate, the Fed helps keep the economy in balance over the long term. Understanding the relationship between interest rates and the U.S. economy will allow us to understand the big picture and make better investment decisions.

The bottom of this lesson in economic finance is that the Federal Reserve is doing a job to destroy the “Make America Great Again” economy by tightening the screws on credit and interest. The banks have restricted lending for more than a year, as was the case in 2006. The economy was in the tank by 2007, leading to the crisis in which the American public was stuck with a tax bill of \$750-billion to bail out the banks. Congress passed a tax bail out so that only one bank, Lehman Brothers went bankrupt on September 15, 2008. Few financial people thought the Rothschild’s would allow or permit Lehman Brothers to go under as Lehman Brothers was one of the original bank owners of the Federal Reserve System, yet that is what they did.

President Donald J. Trump wants to bring down the Fed, but he wants the public to see the Fed destroying the “Make America Great Again” economy as the root cause. If you follow the news, the President keeps pointing the finger and verbally blasts Stanley Fisher, current chairman of the Fed, for undermining his growing economy. Stanley Fischer took office as a member of the Board of Governors of the Federal Reserve System on May 28, 2014, to fill an unexpired term ending January 31, 2020. He was sworn in as vice-chairman of the Board of Governors on June 16, 2014. He resigned on October 13, 2017, to become Chairman of the Federal Reserve earlier this year. Prior to his appointment to the Board, Dr. Fischer was governor of the Bank of Israel from 2005 through 2013.

The Rothschild’s have used their globalist media mouthpiece to declare that Donald Trump is threatening to destroy the New World Order, for good. Globalism propaganda tool and

Rothschild family-owned publication, *'The Economist'* has branded the US President a "present danger" to the "New World Order," and stated that the "internationalists" that formed it are "spinning in their graves. "*'The Economist'* names Trump as the biggest threat to the "liberal" New World Order above other legitimate threats such as jihadism and terrorism, Communist Chinese expansion, and North Korean hostility." Ultimately the House of Rothschild will introduce the "cashless" economy and the RFID microchip, we know to be the "Mark" of the Beast in Revelation 13:17 (and Revelation 14:11; 15:2; 16:2; 19:20; and 20:4).

Perhaps the greatest danger at present is the incumbency of an American president who despises international norms, who disparages free trade and who continually flirts with abandoning America's essential role in maintaining the global legal order," writes *'The Economist'*. In plain words, the Rothschild's are saying; don't upset our business model, if you know what is good for you!

The Federal Reserve has been a ball on a chain for the American public. President Donald Trump has made moves to gain full control of the Rothschild-owned Federal Reserve in order to remove the crippling regulations holding the country back for so many years. The Federal Reserve has been a burden on the American public, by creating debt and adding stringent regulations on the nation. Trump claims the Federal Reserve's rising interest rates and slowing the growth within the money supply is hindering the growth of the American economy. He is 100% correct and so he is trying to wake the public up to this fact, to build support for his PLAN to "nationalize" the Federal Reserve.

According to CNBC: After these two are put on the Fed's board, the president will then nominate two more to follow them. In essence, it is possible that six of the seven Board members will be put in place by Trump. The Federal Open Market Committee has 12 members and sets the nation's monetary policy. Seven of the 12 are the members of the Board of Governors. Five additional are Federal Reserve district bank presidents. Other than the head of the Fed bank in New York, who was nominated by the president, the other four can only take their positions as district bank presidents if the board in Washington agrees to their hiring. One of these, the Fed Bank president in Minneapolis, Neel Kashkari, is already arguing for no further rate increases. Following the passage of the Dodd Frank Act in July 2010, the Fed was given enormous power to regulate the banking industry. It moved quickly to implement a number of new rules. The Fed set up a system that would penalize banks that failed to obey its new rules. These rules included setting limits as to how big an individual bank could be; how much money the banks had to invest in fed funds and Treasuries as a percent of their assets; which loans were desirable and which were not; where the banks had to obtain their funding and many, many, more up to and including how much a bank could pay its investors in dividends.

In years past, sitting Presidents in the White House, played ball with the Fed, largely nothing more than robo signing. A robo-signer is an employee of a mortgage servicing company that signs foreclosure documents without reviewing them. Rather than actually reviewing the individual details of each case, robo-signers assume the paperwork to be correct and sign it automatically – like robots. The presidents simply rubber-stamped his signature on appointees to the Federal Reserve Board of Governors, as a formality.

These rules have meaningfully slowed bank investments in the economy (the Volcker Rule) and they have had a crippling effect on bank lending in the housing markets (other agencies have had an impact here as well). Thus, of all of the government agencies the Fed has been possibly the most restrictive. The president has already moved to correct these excesses by putting in place a new Fed Governor (Randal Quarles) to regulate the banking industry. This led to killing economic growth in the second quarter of 2018; the growth in non-seasonally adjusted money supply (M2) has been zero. That's right the money supply did not grow at all. This is because the Fed is shrinking its balance sheet ultimately by \$50 billion per month. In addition, the Fed has raised interest rates seven times since Q4 2015. Supposedly there are five more rate increases coming. This is the tightest monetary policy since Paul Volcker headed the institution in the mid-1980s. It will be recalled because his policies led to back-to-back recessions.

Current Fed monetary policy is directly in conflict with the president's economic goals. Moreover, the Treasury is estimating it will pay \$415 billion in interest on the federal debt in this fiscal year. A better estimate might be \$580 or \$600-billion if rates keep going up. There are a lot of bridges and tunnels and jobs that could be created with this money. Then there is inflation. It is likely to rise if the Fed eases its policies. If that happens paying down the federal debt becomes easier with cheaper dollars. On a less desirable note, higher interest rates lower real estate values. Lower rates that stimulate inflation increase real estate values. Bottom Line: The president can and will take control of the Fed. It may be recalled when the law was written creating the Federal Reserve the Secretary of the Treasury was designated as the head of the Federal Reserve. We are going to return to that era. Like it or not the Fed is about to be politicized, and the end game is to destroy the Fed before the Fed destroys the dollar, which underwrites most of the world economies.

In October, 2016, Trump Booted the Rothschild's From Palm Beach Society and banned them from entering his Mar-a-Lago Club "*Under Any Circumstances*". Donald Trump recently informed his inner circle that he completed paying off a debt he had to a Rothschild bank and then, "*grabbed Jacob by the scruff of the neck and kicked him out the back door of Palm Beach society.*" This was not common news in the press.

We knew from research prior to the 2016 presidential election, Donald J. Trump had many loans with Rothschild-owned banks. Early on in the Trump administration there was pressure on President Trump to wage a war with Syria and Iran, as these were the last two sovereign states without a Rothschild-owned or controlled central bank. It was General Wesley Clark who revealed on an episode of Oprah Winfrey that the Pentagon was going to take down 7 countries in 5 years. The last two names on the list shown to General Wesley Clark were Syria and Iran.

In 2018, President either changed his policy on the Middle East or learned to the extent the Rothschild's control the world of finance or who really controls the finances of the world. Events took a 180-turn in December, when President Trump announced withdrawal of thousands of troops in Syria and Afghanistan. I have seen criticism of the President by retired flag officers, including Stanley McCrystal and a Navy admiral, whose name I cannot recall. The essential point

here is that relations between President Trump and the House of Rothschild have been strained greatly.

This meeting featured the future President pounding his fist on the table and vowing to destroy Hillary Clinton's corrupt globalist financiers, according to a Mar-a-Lago source. As evidenced by an explosion of interest in Illuminati central banking, Trump is making great strides through his anti-corruption Twitter campaign.

"They do not own the world, and they do not have carte blanche to do whatever they want. If we do not challenge them there will be other issues. We will not be bullied by them!"

It is understood that the Rothschild banking racket was a noose tied around the neck of the Palm Beach society. Once the knot was tightened, America's entrepreneur class would struggle and choke around the Trillionaire European aristocrats.

A keen student of history, well versed in world affairs, Trump studied the secret knowledge of the world's most elusive organization. It's rumored that the fabled developer is extremely angry about the role financial collaborators have played in fomenting the major international conflicts of the 20th century. People call Trump the vilest of terms, but he was well-educated, two years at Fordham University, and two years at Pennsylvania's Wharton School of Business, both top-notch universities.

The Rothschild's invasive roots keep spreading around the world, but Donald Trump has stopped them from expanding into Florida. This is a major blow to their plans for American domination and they've long viewed the billionaire philanthropist as a real threat. He has them

running scared, which is why he is degraded in the corporate Hollywood media at every opportunity.

The reality is that Trump is leading us towards a multi-polar world, far from the one government, one religion future plotted by the New World Order. When he made the brave move to run for president and protect a sovereign state, he further enhanced his reputation as a beloved leader, a president of the people, just as President Andrew Jackson was known. Sheeple around the world need to wake up and notice!

Insider Trump or Outsider Trump?

Which is it? US Republican presidential candidate Donald Trump has painted an image of himself as an anti-establishment “outsider”. However, is this just another of the businessman’s slick marketing campaigns? Trump now has massive popularity among voters and easily dwarfed 16 other candidates in becoming the Republican nominee. He is also receiving lavish Trump worship from certain segments of the Alternative Media. For many years now, we have known that the left-right election contest presented to the average voter is a magician’s trick and a false dichotomy; One party with two flavors to choose from!

It’s a sleight of hand which cons the unaware voter into thinking they have a real choice and a real say in how the country is run. Meanwhile, both parties are controlled by the same forces behind the scenes, which advances the same agenda regardless of whether a more “liberal” or “conservative” government is in power. It’s time to take a look at Trump (or as John Oliver puts it, the much less impressive Donald “Drumpf”) and see whether his claims of being truly independent, and his image of being free of influence from groups connected to the New World Order (NWO) establishment, are genuine. Is it fair to label him insider Trump or outsider Trump?

The US Republican Party: Owned by Rothschild

Many of the GOP line of nominees have ties to the Rothschild’s, the key family of international banking and the NWO, and the owners of Israel. As Michael Collins Piper (American Free Press) points out in his article Rothschild Influence Deep [Jacob Rothschild](#), the current Republican candidates are linked to either neoconservatives, Zionist Israel, Goldman Sachs and the Council on Foreign Relations (CFR), or all of them at once. All of these groups, nations or companies lead back to Rothschild. Former candidate **John McCain** raised campaign funds from one of Rothschild’s English houses! **Marco Rubio** is close to Israeli-born influential intellectual Yuval Levin. **Bobby Jindal** also turned to Levin, in addition to being a Rhodes Scholar.

Cecil Rhodes, a mining magnate and British politician, established the Rhodes scholarships to attract the brightest young minds for his plan of global government. William J. Clinton was one of those recipients of a Rhodes scholarship. He studied at Oxford, but never finished his Ph.D.

program (the Scholarship was set up to recruit bright-minded and ambitious youth to the Rothschild-Cecil Rhodes cause of an Anglo-American New World Order). **Ted Cruz**, whose father is a Christian Zionist minister and whose wife is with Goldman Sachs, was drafted to Victoria C. Gardner Coates, aide to former Defense Secretary Rumsfeld (behind the George W. Bush-era wars) as his national security advisor. Even the libertarian **Rand Paul** is close to retired diplomat and CFR member Richard R. Burt and billionaire Peter Thiel, chair of the American steering committee for the Rothschild-financed Bilderberg meetings. However, to my knowledge, Rand Paul has not been invited to Bilderberg gatherings, at least not yet.

Outsider Trump? Trump is no exception in this **Rothschild connection**. We know insider Trump has socialized and cut business deals with the wealthy Manhattan elite for decades. It has been insider Trump that has been pushing the hard line of Islamophobia within America, much to the benefit and delight of the Zionist regime of Israel. He's told us he knows the Clintons. Many theorized that Trump was actually running to split the vote and throw the election to career criminal Hillary Clinton. Luke Rudkowski ('We Are Change') recently exposed how Trump is turning to the CFR for military and foreign policy advice. There is even a possible but as yet unproven connection between Trump and pedophilia through his inclusion in Epstein's little black book.

Despite this, the Republican establishment began a campaign to stop him from getting the nomination and threatened to vote Democratic/Hillary. Nothing is black and white, but given Trump's copious ties to NWO-related people and agendas, it's a stretch to call him an outsider, even if he may not be a full insider. Newt Gingrich slipped up on the MSM (Mainstream Media) recently when he revealed that Trump was not an insider because he was not part of the club and

had not *“been through the initiation rites”* – with an obvious admission that Secret Societies like Freemasonry, Skull and Bones, Bohemian Club, etc. run the show.

Insider Trump and Resorts International: Mafia, CIA, Mossad, Rockefeller and Rothschild Trump are most assuredly connected to the most powerful groups in the world through his business dealings. In another article *Who Towers Behind Trump?*, Piper reveals how Trump acquired 93% of the voting stock in gambling company Resorts International in 1987:

“Resorts International was established and controlled by front men for the Rockefeller and Rothschild families and their “enforcers” in the Central Intelligence Agency (CIA) and its allied intelligence agency, Israel’s Mossad. What made the report so explosive was that this newspaper pointed out that the illegally rigged casinos were being operated with the collusion of “respectable” politicians, law enforcement officials, Wall Street financiers who floated loans to finance the gambling resorts and the high-profile gambling resort operators themselves.

... Many of these casino resorts run by the mob through a variety of front men have actually been engaged in a de facto partnership with behind-the-scenes mobsters who have assisted the CIA and the Mossad in massive laundering of drug and gambling profits that have been channeled into covert operations of the two allied intelligence agencies. In return, the CIA and the Mossad, using their own influence, have provided “protection” for the illegally fixed gambling operations, preventing law enforcement authorities from cracking down on this corruption.”

Insider Trump bought a casino (CIA front company) run by the Mafia, CIA and Mossad, and funded by the Rockefellers and Rothschild’s. It’s an old game. Get control of government, set up and control secret military agencies that effectively operate outside the law to become your personal goon squad, and then control illegal industries like gambling, drugs, arms and prostitution. Anyone who has closely studied the origins and operations of the CIA will know that the agency has barely ever or never represented the American people, and in 1953 quickly grew (under the control of the JFK assassination mastermind Allen Dulles) into a private hitman group to protect the interests and investments of the wealthy.

So what is Trump’s role in all of this? Resorts International was formerly a CIA front company (Mary Carter Paint) that Trump took over. Piper sources an article from *‘The Spotlight’* magazine, which researched the investors behind it:

- *“Meyer Lansky, the acknowledged “chairman of the board” and chief financier of the underworld gambling syndicate, who maintained his own longstanding ties to not only Israel and the Mossad, but also the CIA and the American intelligence community (and who was another figure in the JFK assassination – ed.).*
- *David Rockefeller, head of the Rockefeller financial empire, who provided his family’s clout and CIA and global banking connections to assist in the operation.*
- *The Investors Overseas Service (IOS), then the world’s largest flight-capital conglomerate, controlling assets worth \$2.5 billion.*

- *Tibor Rosenbaum, who was not only the Mossad's Swiss-based chief financier behind covert arms deals but also the head of the Banque De Credit Internationale of Geneva, the Lansky syndicate's chief European money laundry.*
- *Baron Edmond de Rothschild of the European banking family and a personal business partner of Rosenbaum in Rosenbaum's Mossad-related ventures ranging far and wide.*
- *Lastly, William Mellon Hitchcock, one of the heirs to the Mellon family fortune (one of America's largest private family fortunes, which, for many years, have also maintained close ties with the CIA).*

Then in 1987, upon the death of longtime CIA front man James Crosby, the nominal head of Resorts International, up-and-coming young New York real estate tycoon Donald Trump stepped into the picture and bought Crosby's interest in the gambling empire."

Beware of politicians calling themselves "Outsiders". Career politicians make a living learning how to become most electable and how to best appeal to voters. Their ambitions, career and income all depend on it. Depicting yourself as agent of change, or an outsider, is a very obvious tactic of politicians who want to get voted in. Undoubtedly, there are some genuine politicians who bring genuine change for the better. However, at this stage in the game, the general public all over the world has been so massively hoodwinked and deceived for so long that it would be wise to be extremely skeptical of any politician making the "outsider" claim. Importantly, the voting public needs to do its homework to check out and investigate the history and connections of any would-be leader, especially outsider Trump, or insider Trump – however you look at him.

Benjamin Fulford, an investigative journalist who covers Japan and eastern Asia headlined one of his reports: "Good side" of Rothschild family says Trump will stage financial reset.

The deadlock has ended in the undeclared U.S. civil war that lasted all summer, and the good guys have already begun a series of stunning moves against the cabal, including shooting down their secret satellites, multiple sources confirm. Also, a complete reset of the global financial system has already begun; assert CIA sources connected to the self-described "good side" of the Rothschild family. And this is just a prelude to what promises to be a very eventful time that began in the month of September, 2018 the sources agree.

The satellite shoot-down was first reported by the mysterious blogger "Q" and has been independently confirmed by three separate sources. "On August 30, CIA satellites and supercomputers were taken down and likely seized by [U.S. President Donald] Trump's new space force, and GCHQ [British Intelligence] was removed from the NSA database to also render cabal elements in the UK, Australia, Canada, New Zealand, Japan, France, Germany, and Israel deaf and blind," Pentagon sources explained.

A CIA source in Asia who was involved in setting up the secret satellite network that was taken down last week issued the following warning to colleagues: *"We are in potential danger. I hope your vehicles have fuel and you have emergency food and water on hand. There's no telling who did this or why... and now that some of our satellites are down, God only knows what may be coming at us."*

Meanwhile, a third source says Nathaniel Rothschild's faction was involved in the shoot-down, saying, *"Nat is back in play. He is with us. We are dismantling the Nazi/Antarctica global grid of communications. This includes several orbiting satellites, one of which has already been eliminated."*

The communications takedown is a prelude to both a military and financial offensive against the cabal, Pentagon and CIA sources agree. For reasons of operational security, the Pentagon sources cannot say much about the military action other than "a U.S. military offensive is under way to terminate the defenseless and disoriented cabal."

When Donald J. Trump announced his candidacy for president in June, 2016, I began my own study of candidate Trump; I have been listening to Rush Limbaugh thirty-years, at least back to the days when he did a television program during the 1990's. The student lounge area outside of the Asbury Seminary student center and cafeteria always would have several dozen lounge couches and chairs in a tight circle around the television during the noon hour. Rush Limbaugh has become an important source of information on understanding Donald Trump for me, particularly after being officially retired from pulpit and pastoral ministry.

From the background information noted, there is no lack for pundits and commentators about who Donald J. Trump really is. Early on I had my own doubts as to the Trump agenda. When I discovered that a portrait of Andrew Jackson was hanging on the wall in the Oval Office my interest began to perk up even more. I am not naïve concerning the immensity of the task he has on his plate. No fewer than two previous presidents have tried to do what President Trump is about only to be assassinated by individuals tied to the Crown/Jesuit-Vatican/House of Rothschild. I am referring to Abraham Lincoln and John F. Kennedy.

Most people do not know that both Lincoln and Kennedy went against the House of Rothschild when they created U.S. Notes (not issued by Rothschild's banks). For Lincoln it was his "Greenbacks" and Kennedy it was his "silver-backed" \$2 and \$5 denominated bills. Most people are not familiar with the name Rothschild despite the fact that the Rothschild's own \$500-trillion dollars in assets. You will not see their name on the 'Fortune' or 'Forbes' or 'Money' magazine lists of the world's richest. The Rothschild's prefer it that way and there is an understanding in publishing that to mention their name would be risky at best.

The FED and the IRS

Virtually unknown to the general public is the fact that the U.S. Federal Reserve is a privately owned company, sitting on its very own patch of land, immune to the U.S. laws.

This privately owned company (controlled by the Rothschild's, Rockefeller's and Morgan's) prints the money for the US Government, which pays them interest for the "favor." This means that if we would reset the nation's debt today and would begin reprinting money, we would be in debt to the Fed from the very first dollar loaned to our Government.

Also, most people living in the USA have no clue that the Internal Revenue Service (IRS) is a foreign agency. To be more accurate, the IRS is a foreign private corporation of the International Monetary Fund (IMF) and is the private "army" of the Federal Reserve (Fed). Its main goal is to make sure the American people (voluntarily) pay their tax and be good little slaves.

In 1835, US President Andrew Jackson declared his disdain for the international bankers: ***"You are a den of vipers. I intend to rout you out, and by the Eternal God I will rout you out. If the people only understood the rank injustice of our money and banking system, there would be a revolution before morning."***

There followed an (unsuccessful) assassination attempt on President Jackson's life. Jackson had told his vice president, Martin Van Buren: *"The bank, Mr. Van Buren, is trying to kill me."* This was the beginning of a pattern of intrigue that would plague the White House itself over the coming decades. Both Lincoln and JFK have been murdered for trying to rid the country of banksters. This is precisely why we should have concern about the health and safety of President Trump and his family as well.

The World's Megabanks

There are two Megabanks that offer loans to all the countries around the planet, the World Bank and the IMF. The first one is jointly owned by the world's top banking families, with the Rothschild's at the very top, while the second one is privately owned by the Rothschild's alone. These two Megabanks offer loans to "developing countries" and use their almost impossible-to-pay-back interests to get their hands on the real wealth: land and precious metals.

But that's not all! An important part of their plan is to also exploit a country's natural resources (like petroleum or gas) via their covertly-owned companies, refine them, and sell them back to the same country, making a huge profit. John Perkins writes of his experience in his book, *'Confessions of an Economic Hit Man'*. He worked for one of the many Rothschild entities to enslave "developing countries" around the world.

But in order for these companies to operate optimally, they need a solid infrastructure, which is usually lacking in the "developing countries." So before the bankster's even offer the almost impossible-to-pay-back loans, they make sure that most of the money will be invested in — you've guessed it — infrastructure. These "negotiations" are carried out by the so called "Economic Hitmen", who succeeds by handsomely rewarding (i.e. bribing) or threatening with death those who are in the position to sell away their country.

The one bank that rules them all, the "Bank for International Settlement," is — obviously — controlled by the Rothschild's and it is nicknamed the "Tower of Basel." It is located in Basel, Switzerland. Employees of the BIS have global diplomatic immunity and do not pass through customs as other business men and tourists.

The true power of the Rothschild's goes FAR beyond the Banking Empire. If you are not yet amazed by the power of the Rothschild's, know that they are also behind all wars since Napoleon lost to Wellington. That's when they discovered just how profitable it was to finance both sides of a war and they've been doing it ever since.

In 1849, Guttle Schnapper, the wife of Mayer Amschel stated: *"If my sons did not want wars, there would be none."* So, the world is still at war because it is very, very profitable to the Rothschild's and their parasitic bankster bloodlines. For as long as we will continue to use money, the world will never know peace!

It is shocking for many to find out that the United States of America is a "corporation" ruled from abroad. Its original name was the Virginia Company and it was owned by the British Crown (it should not be mistaken for the Queen, which functions largely in a ceremonial capacity only). The British Crown donated the company to the Vatican, which gave the exploitation rights back to the Crown. The U.S. Presidents are appointed CEOs and their business is to make money for the British Crown and the Vatican, who take their share of the profits every year.

The British Crown covertly rules the world from the 677-acre, independent sovereign state, known as The City of London. This other Crown is comprised of a committee of 12 banks headed by the Bank of England. Guess who is controlling the Bank of England? Yep, the Rothschild's.

In 1815, Nathan Mayer made the following statement: *"I care not what puppet is placed upon the throne of England to rule the Empire on which the sun never sets. The man who controls Britain's money supply controls the British Empire, and I control the British money supply."*

The House of Rothschild is really at the top of the pyramid of power. They are behind the New World Order and the complete domination of the world agenda. They are behind the European Union and the Euro and they are behind the idea of a North American Union. They control all of the world's secret services and their private army is NATO headquartered in Brussels, Belgium.

Today, the control of operations of the Rothschild's was recently placed into the hands of young 47-year-old Nathaniel Rothschild.

Nathaniel Philip Victor James Rothschild (born July 12, 1971) is a British-born financier who settled in Switzerland and is a member of the Rothschild family. He is chairman of JNR Limited, an investment advisory business primarily focused on emerging markets in the metals, mining and resources sector. He was co-chairman of Asia Resource Minerals PLC, a natural resources group that he helped create and that is listed on the London Stock Exchange and was co-chairman of the hedge fund Atticus Capital from 1996 until its dissolution in 2009. He also has a wide range of international business interests and is the heir to the title of Baron Rothschild, held by his father Jacob Rothschild.

Another Rothschild, David, son of Evelyn Robert de Rothschild let loose a number of verbal blasts full of expletives at President Donald J. Trump on "Twitter" during December, 2018. They came in the wake of President Trump's statements about how the Fed was undermining the "Make America Great Again" economy. His father, Evelyn Robert de Rothschild, is married to the American Lynn Forester de Rothschild; Lady de Rothschild (born July 2, 1954) is an American-British businesswoman who is the chief executive officer of E.L. Rothschild, a holding company she owns with her third husband, Sir Evelyn Robert de Rothschild, also a member of the Rothschild family. From 1993–1995, Rothschild served on President Bill Clinton's National Information Infrastructure Advisory Council. From 1998–2000, she served on the US Secretary of Energy's Advisory Committee.

Rothschild has donated to all of Bill and Hillary Clinton's federal races since 1992. Although Rothschild was a major fund raiser for Hillary Clinton's 2008 presidential bid, she transferred her support to Republican candidate John McCain when Barack Obama beat Clinton, eventually becoming a minor celebrity at the time for attacking Obama in a series of interviews on cable television.

On June 22, 2011, Rothschild hosted a fundraiser for Jon Huntsman Jr.'s presidential campaign, an event originally planned to support Mitt Romney before she had a change of heart in the early summer of 2011. In the summer of 2016, she hosted a fundraiser for Hillary Clinton's 2016 presidential campaign, but their relationship cooled in 2016. However, judging by pictures taken at what would be described as satanic gala parties, Rothschild and Hillary do share satanic interests.

She was introduced to her third husband, Sir Evelyn de Rothschild (born August 29, 1931) by Henry Kissinger at the 1998 Bilderberg Group conference in Scotland. They married on November 30, 2000 in London, England, after de Rothschild divorced his wife in 2000. On the announcement of the marriage, the Rothschild couple was invited to spend their honeymoon at the White House by the Clintons. The couple divides their time between their summer home on Martha's Vineyard in New York and the Rothschild family's historic Ascott country estate in London, England. By virtue of her marriage to a knight, she is known socially as Lady de Rothschild.

The relationship between the Rothschild's and Hillary Clinton appeared to have faltered in 2016. A tweet or two by Hillary to Lynn Forester de Rothschild were apologetic by Hillary Clinton. Rothschild's idea of how the monetary management system should be conducted developed a long time ago. Then, the Federal Reserve Bank actually controlled the situation. The strategy for it was carried out by Rothschild's structures, primarily by "Goldman Sachs."

Russian expert in economics Michael Khasin has expressed his position towards this statement. The Rothschild's are worried about losing control of their centuries-old Golden Goose!

"Since then, the situation has changed. At the current time, they can attempt to regain control, although it will be very difficult. The Federal Reserve Bank is under the White House, and men from "Goldman Sachs" were not represented in Obama's administration since 2013. Three years have passed since the Rothschild's lost control over the world economy. Even if they try to steer it right now, it will not lead to any good results. All the heads of central banks are cornered."

"The geopolitical situation is a consequence of the economic situation. The whole model of control over geopolitics, which was lined up in 1944 and was finally established in 1991 with the destruction of the USSR, was built on the dollar economic model. This model does not work anymore, that is why the geopolitical configuration is disintegrating."

You are probably asking yourself, what does this have to do with the price of bagels at the corner of Times Square and Broadway, in New York City? Well, in 2000, there were eight countries without a Rothschild-owned or controlled central bank. These were: Afghanistan, Iraq, Sudan, Libya, Cuba, North Korea, Iran, and Syria. Until recently, the list of countries without a Rothschild-owned central bank had declined to Cuba, North Korea, Iran, and Syria. Then something major occurred in 2014.

In 2014, Vladimir Putin did exactly what Lincoln and Kennedy were unable to do and for their trying it cost them their lives in the process. Now President Donald Trump is going to try to do much the same thing as Russian President Putin did. In order to understand **"THE PLAN"**, you need to understand what Vladimir Putin was faced with. Under the Constitution, the Central Bank of Russia belonged to a foreign State – the City of London – and was taking orders from London and Washington. This bank can only print money corresponding to its cash in foreign currency, which is not sufficient for Putin's purposes. The CBR even had to buy (worthless) U.S. bonds for the dollars paid for with Russian oil – whereby the dollars return to the FED! Moreover, Putin was under pressure from the West, which wanted to overthrow and replace him with Western-minded

oligarchs. The US ambassador to Moscow, John Tefft, was said to have made it very clear: *“We will displace Putin from office and install our people as leader of the government (he even mentioned the person by name) and appoint ministers”*.

Therefore, Putin needed a strong army to prevent Russia’s submission to the U.S. Fyodorov said in an interview: *“A split in the Russian elite took place two months ago, as part of the elite decided to stay with Putin.”* Putin then made his decision, which defines the events that followed. Furthermore, the logic of 1) a state of emergency or 2) geopolitical war entered into force, while Russia was under stiff pressure.

What this meant was, **a.** Americans now could not diminish their pressure, while **b.** Russia had to enjoy the pressure, because it forces them technologically into national liberation. For many years, Russia could not obtain de-offshoring, but American pressure has performed this in a single day.

Putin had to mercilessly clean out the 5th column – in the Central Bank, the Ministry of Finance, and the Ministry of Economy. A **fifth column** is any group of people who undermine a larger group from within, usually in favor of an enemy group or nation. The activities of a fifth column can be overt or clandestine. Forces gathered in secret can mobilize openly to assist an external attack. This term is also extended to organized actions by military personnel. Clandestine fifth column activities can involve acts of sabotage, disinformation, or espionage executed within defense lines by secret sympathizers with an external force.

Above all, Putin saw the West as the big speculator against the ruble. To sum up the plan straightforward, it consisted of four phases:

- * A split in the government
- * Identification of the fifth column in government, in business, in the media
- * Purge the opposition
- * A parallel active position on the Ukraine, because Ukraine and Russia is essentially the same Putin said. With these words he defined his position and strategy for Russia.

Nationalization of the Central Bank of Russia would be the first signal and meet the final breach with Rothschild’s City of London / the British Empire / the “British (bankster’s) Crown” and its tool, the United States. Their relationship has been tense since Putin’s seizure of the Rothschild/Chodorkowsky’s Yukos shares. Therefore, Putin hesitated with the nationalization. He also still needed authorization to enforce his plan as a strong man. For this he needs a “great necessity” which is supposedly imminent because of US aggression.

In those meetings between Putin and Trump that took place in 2017 and 2018, one of the chief topics of discussion was about how Putin managed to pull off “Nationalization of the Rothschild Central Bank of Russia”. I have briefly outlined Putin’s strategy in those four points. President Trump is “precisely” following those four points in his “PLAN”. For now, the important point is that President Trump is following Putin’s Plan to get out from under the Rothschild-owned Central Bank!

This chapter has been long but necessary so that Americans can understand what President Trump has been doing since elected President. President Trump's primary goal here has been to nationalize the Rothschild Federal Reserve System, bring about the restoration of a National Currency backed by gold and silver. Linked to the "PLAN" was the matter of pedophiles in the highest office, a network of child trafficking with the CIA acting as a procurement agency with the Vatican and sicko world leaders around the world. There may have been knowledge revealed that the Secret Service detail had to cancel a Christmas Party because of an issue with child pedophile pervert Vice-President Joe Biden, who is known for his fondling children and the wives of Secret Service agents. The Vice President was caught on a hot mic saying, "Do you have any idea how horny I am to have a 13-year old girl standing right next to me?" Most normal adults find that repulsive, and it became President Trump's passion to bring this dark world down.

The Plan - Operation Q

Operation Q was in Phase 5 of 5 phases to save the economy through a revaluation of the fiat US Dollar into a gold/asset-backed US Note via a Global Currency Reset, plus gain back control of US political affairs through restoration of the original Constitution.

Such would dissolve the Federal Reserve and return U.S. taxpayer money back to The People.

Rumored Schedule:

Jan. 2 or 7 2019:	General Public begins exchanging
April-May 2019:	New Elections held
Date Unknown:	Martial Law Enforced, US Space Command Active

A. Redemption/Exchange Appointments:

1. The new Quantum Financial System has been successfully tested multiple times, was fully integrated, operational and impenetrable, with a mandate that all procedures be transparent.
2. In a December 25, Christmas recorded phone call to the troops in Iraq and elsewhere President Trump announced that we would see monetary reform this week, meaning by Saturday night December 29.
3. Pre-release meetings with the Chinese, UST in Reno and core account leaders for the GCR release indicated they would become liquid and final sign offs made Christmas Eve December 24 when Trump was out of the country in Iraq (a requirement for the RV).
4. By December 28 a final plan and schedule had been approved for the GCR, with paperwork signed between Wells Fargo and HSBC banks.
5. Iraqi Prime Minister accepted President Trump's invitation to visit Washington White House on New Year's Eve December 31, although it might be Jan. 8.
6. Redemption appointments appeared likely to be received on Saturday December 29 after all banks were closed by 8pm EST, while the 2019 global trading year started Sunday December 30 at 1 a.m. EST (10 a.m. GST in Dubai). Others say it won't happen until Dec. 31.
7. Zim holders (who could also exchange their currency) had an unknown deadline to begin, would be contacted by text messaging and could be redeemed at military facilities.
8. Currency holders would use 800#'s to make their appointments and exchange at off-site locations. Those requesting the higher back screen rates would complete before the general public began exchanging around Jan. 2 or 7 (these dates could have changed).
9. The General Public would exchange at banks by Jan. 2 or 7 (these dates could have changed).
10. Prosperity Packages would be distributed on Jan. 3 or 4 (these dates could have changed).

B. Stock Market:

In late afternoon Friday December 28 after three massive buy orders, the Stock Market went on another wild roller coaster ride. The Dow closed down 76 points from Dec. 27th's 800 point spike. The Stock Market would continue to show radical volatility so that mass amounts of monies released during the Global Currency Reset would act as a cover for a deliberate Market manipulation designed to collapse Stocks and eliminate large Cabal corporations, along with their old US fiat dollar system.

C. Restored Republic:

1. The Federal Reserve and I.R.S. were eliminated by Trump's Executive Order on December 29.
2. Trump was making the US fully GESARA (Global Economic Security and Reform Act) compliant so that the US Republic would be Restored by January 1, as were 209 sovereign nations wishing to participate in the GCR – although a few have not yet made it. This is an open threat to Rothschild-owned or controlled Central Banks.
3. By the first part of 2019 Central Banks would be reorganized and announcements made on the GESARA Law, US Restored Republic and a new Flat Tax System - said to be 17% on newly bought items only, with no tax on food or medicine, and possibly clothing.
4. Congress was not expected to return on January 3 because of a government shutdown and pending arrests of at least 1/3 if not more, of Congressional members named in the over 71,000+ sealed indictments.
5. Throughout history the Cabal had been controlling votes of a great number of politicians through blackmail of their pedophilia, Satanic worship and money laundering activities. It has been revealed that Supreme Court Justice John Roberts is a traitor. He personally signed off on all 12 of the FISA warrants in the witch hunt by former FBI Director Robert Mueller.
6. These illegal acts were organized through Satanic worshipping global elites who ran an international gun running, drug dealing and child exploitation ring called the Ninth Circle Child Sacrifice Cult that was organized by the Vatican, funded by the British Monarchy through Central Bank's use of US taxpayer dollars and enforced by various mafias.
See source: <http://beforeitsnews.com/contributor/pages/243/590/stories.html>
7. Thousands would be arrested, though their pedophilia charges wouldn't necessarily be made public, their indictments showing other charges like treason, fraud, embezzlement, racketeering, sedition and/or murder.
8. On December 29 the first of 71,000+ indictments was unsealed, charging Hillary Clinton and 40 other global elites such as James Comey and Harry Reid, with Murder, Wrongful

Prosecution, Abuse of Powers and Treason Against Peoples of the US. Harry Reid is reported as of January 3, 2019, to be dying of Pancreatic Cancer.

1. Hillary Clinton's unsealed indictment Case no 1:16 CV 1490 filed Feb. 16 2018 in the US District Court, Northern District of New York and served on defendants April 4 2018 regarded the Nevada Bundy Ranch and Hammond Cases. 649 pages, and 27 videos.
2. Charged: What appeared to be over 40 people including Hillary Clinton, James Comey, Loretta Lynch, FBI agents, US Attorneys, Judges, Magistrates, Local and state police, BLM, and NGO Contractors.
3. Charges: Murder, Wrongful Prosecution, Abuse of Powers, Treason Against Peoples of the U.S. and was connected to the Uranium One Deal (Obama, Clinton). As Secretary of State under President Obama, Hillary Clinton gave Russia 1/5th of the U.S. uranium reserves, for which \$145-million dollars was then donated to the Clinton Foundation. FBI head, Robert Mueller personally delivered validated amounts of "yellow cake" uranium to the Russian agents.
4. Orders to the FBI and local law enforcement to end the Bundy Ranch case with violence came straight from the White House (Obama, Clinton). Thus sealed indictments for murder against Barack Obama and Hillary R. Clinton.

President Donald Trump keeps playing three-dimensional chess while the "Deep State" keeps playing checkers.

Knowing from the outset that the "Deep State" would do everything in its power to destroy him, this report continues, President Trump spent his first year in office creating his own private global spy network—that, in January 2018, he got the U.S. government to pay for by having his Republican Party controlled U.S. Congress pass a new law allowing him to secretly shift intelligence monies anywhere he wanted to—that is overseen by Stephen Feinberg, the man who already

controls one of the largest military contractors in the U.S. named DynCorp International, and who is now the head of the President's Intelligence Advisory Board (PIAB).

Aiding both President Trump and (PIAB) head Feinberg in this war against the “Deep State”, this report details, is Erik Prince—who many believe created Trump’s private global spy network with former US Marine Colonel Oliver North—but is more infamously known as the founder of the feared and powerful private intelligence and mercenary company Blackwater, that’s now known as Academi—with it further to be noted that Prince is the brother of multi-billionaire heiress Betsy DeVos, who herself is Trump’s powerful US Secretary of Education, and whose major long term goal is “to advance God's kingdom through the US school system”.

Most critical to understand about what President Trump is fighting against, this report says, is the best example by the declaration made to all Western nations by “Deep State” globalist leader Chancellor Angela Merkel of Germany stating that “nation states must today be prepared to give up their sovereignty, and must not listen to the will of their citizens when it comes to questions of immigration, borders, or even sovereignty”.

First to react against this “Deep State” globalist agenda to destroy nation states, this report continues, was Turkish President, Recep Tayyip Erdogan—who in fearing for the fate of his nation, marshaled around himself his country’s deeply religious Muslim peoples to do battle against these godless globalists—and in turn, in 2016, was met by a coup attempt against him and his government backed by the Obama Regime—but that was met with failure when tens-of-millions of Turkish peoples flooded into the streets to protect their beloved leader—and whose main observer of what occurred was Donald Trump.

This report further explains, one of the most important facts noticed by then US presidential candidate, Donald Trump about the Obama Regime coup launched against President Erdogan was that the “Deep State” came nowhere close to being a match against Turkey’s devoutly religious citizens who, indeed, took their country back—thus causing Trump to pivot his presidential campaign straight into the waiting arms of his nation’s devoutly religious Christian peoples.

Equally as important, noticed by Trump about the Obama Regime coup launched against President Erdogan, this report notes, was that even though the US backed coup forces controlled government buildings, military installations and major transportation hubs, they failed to take control over Turkey’s 112 Emergency System—that’s actually a European Union system which if the US had tried to compromise would have rung alarms all over the world—thus enabling Erdogan to rapidly reach his entire country and tell them what was happening. Turkish President Erdogan use 112 Emergency System to alert his citizens about the coup taking place.

With President Obama and his “Deep State” allies knowing how powerful an under siege leader can truly be when able to talk directly to their citizens during a time of national emergency, this report continues, they plotted to take this ability away from newly elected President Trump—and that began a few weeks before Trump took power when Obama appointed Jeffrey Storey to the National Security Telecommunications Advisory Committee—and whose tele-communication

giant company he now heads. It is named CenturyLink, and is believed to have been the most compromised by an NSA exploit estimated to have infected over 45,000 routers (that the SVR believes was stolen by the “Deep State” and given to Storey), the most vital of them being the telecom routers that the Presidential Alert Messages must first pass through before they reach the American people.

With CenturyLink routers crashing all over the United States during the past 24-hours, that followed Blackwater’s warning message “We Are Coming”, this report concludes, SVR computer intelligence experts have determined that the NSA has now patched this exploit, and in the process destroyed the coding in nearly all of the telecom routers CenturyLink had secretly directed not to send out alert messages from President Trump—thus leaving Trump still able to directly communicate with the American people, and whom, like the Turkish peoples in 2016, might soon find themselves called into the streets to protect their leader, and their nation.

Government Shutdown = RV/GCR Release = Indictments Unsealed = Mass Arrests
Martial Law Enforced = US Space Command Active = Military Tribunals Held = Republic Restored
GESARA Law Implemented = New Elections Held = Fair Tax System for All

Redemption/Exchange Appointments:

1. The new Quantum Financial System was fully integrated, operational, and impenetrable. It mandated that all procedures be transparent and had been tested in multiple ways.
2. In a December 25 Christmas video that aired to troops in Iraq and elsewhere, Trump said that we were having a monetary reform this week. GCR/RV activation appeared inevitable before January 1.
3. Pre-release meetings with the Chinese, UST in Reno and core account leaders for the GCR release indicated they would become liquid just prior to Christmas. Final sign offs happened Christmas Eve December 24 when Trump was out of the country in Iraq (a requirement for the RV).
4. This morning December 28 they had worked out a final plan with the Wells Fargo and HSBC banks. The whole Alliance indicated they wanted to make sure the final paperwork was initiated December 28.
5. Iraqi Prime Minister accepted President Trump’s invitation to visit Washington White House on New Year’s Eve, December 31.
6. The schedule to receive redemption appointments appeared to be between today, December 28 and next Tuesday January 1, though likely on Saturday December 29.
7. When New York City banks closed Saturday December 29 at 8pm EST, the new 2019 global trading year would start Sunday 1 a.m. EST (10 a.m. GST in Dubai).
8. Sources said the RV was to happen by the end of the week, December 29.

9. We could be contacted anytime today or tomorrow December 29 through receipt of an 800#, or by way of an Emergency Broadcast System text, or email asking us to follow instructions to set our appointments.
10. Zim holders would be contacted by text messaging, redeem at military facilities and by contract would complete by January 1.
11. Currency would use 800#'s and exchange at off-site locations. Currency exchanges requesting the higher back screen rates would complete before the general public began exchanging as early as January 2, (others have said on January 7).
12. Platforms and Prosperity Packages would be distributed on January 3 or 4.
 - **Stock Market:** The Stock Market needed to show radical volatility prior to the GCR so when the liquidity came the world wouldn't know the Market was being manipulated to collapse global markets. On December 26 Trump manipulated the Market into gaining over 1,000 points by tweeting a message to the financial community. In just the last two and a half days, the S&P 500 has witnessed its worst Christmas Eve showing ever, its biggest gain since 2009 and the largest positive reversal since 2010. The volatility would continue as mass amounts of monies became liquid during the GCR.
 - **Restored Republic:** Trump appeared to be making the US fully GESARA compliant so that the US Republic would be Restored by January 1, as were 209 sovereign nations wishing to participate in the GCR – although a few have not yet made it. By year's end the Federal Reserve and IRS would be eliminated, Central Banks reorganized and announcements made on the GESARA Law (freedom from debt of the Federal Reserve), US Restored Republic and a new Flat Tax System - said to be 17% on newly bought items only, with no tax on food or medicine.

Indictments, Mass Arrests, Martial Law

1. With the government shut down and most having been videotaped as they were served their advanced notice of indictments at the Bush funeral on November 30, the lack of communication from Former Presidents and First Lady's the Clintons, Obamas and Bushes; Former Vice President Biden, Former FBI Director Comey, Congresswoman Waters, Businessman and Ninth Circle Satanic Cult Leader Soros, Former Director of National Intelligence Clapper and Former CIA Director Brennan indicated that they had been arrested on, or prior to December 24 – the date of RV release.
2. On January 2, 2019 Federal courts across the nation would begin trials for those arrested as a result of over 71,000+ indictments, plus it was the start date on Military Tribunals for those sent to GITMO, Cuba.

3. It was not expected that Congress would return on January 3 because of the government shutdown, plus pending arrests on at least 1/3 if not more, of Congressional members named somewhere in the over 70,000 sealed indictments.
4. The new US elections would be completed sometime in April-May 2019.
5. The New World Order agenda was all about foisting a One World Government upon the entire planetary civilization. One of the covert goals was to transform the U.S. into one of three corporate plantations that would make up the North American Union that was similar to the cataclysmic European Union. The wealthy elites planned on destroying societies and cultural ties in an effort to homogenize the various populations into corporate slaves. The globalists planned for a complete disintegration of all nation-states, as well as the dissolution of national sovereignty and territorial integrity. Many corporations, politicians and global elites such as full-time bagman for the Rothschild Crime Syndicate, George Soros, exploited this plan for their own gain.
6. Over the past year over 71,000 indictments had been filed in federal courts across the nation – many involving pedophilia, although the actual charges were for other crimes. It was important to hold off arrests as long as possible while exposing the Cabal so when the arrests were done no one would be surprised.
7. Most of Washington and politics were involved in pedophilia activities and thousands would probably be arrested, but the pedophilia charges won't be made public. The arrests would be linked to their other crimes, like fraud, embezzlement, racketeering, treason, sedition, murder, pick a couple.
8. POTUS call sign when he was flying to Iraq: RCH358.
 - Rearrange the letters and you have Hillary.
 - Rearrange the numbers and you get 835 = Military Tribunal Service Charges.
9. Elites who have recently disappeared from social media, tweeting, or texting include:
 - Former President, George W. Bush Jr. - served November 30, Twitter acct private now
 - California Congresswoman, Maxine Waters - no tweets since mid-December 15
 - Businessman, Ninth Circle Satanic Cult Leader, George Soros – no tweets since December 16
 - Former President, Barack Obama - Christmas post from years ago, served November 30
 - Former First Lady, Michael Obama- served November 30, no tweets since December 20
 - Former VP, Joe Biden - served November 30, no tweets since December 21
 - Retired Lieutenant General in the United States Air Force and former Director of National Intelligence under Obama, James Robert Clapper Jr. - no tweets since December 21

- Former Head of the Hillary Clinton Campaign convicted pedophile, John Podesta - no tweet since December 21
- Slick Willie Bill Clinton – Served Nov. 30, Christmas post from years ago, no tweets since December 22
- Hillary Clinton - served November 30, Christmas post from years ago, December 24 code on Air Force One indicated Hillary Clinton had been arrested December 22
- Former CIA Director under Obama, John Brennan - no tweets since December 23
- Former FBI Director, James Comey - no tweets since December 24

December 26 2018 2:36 pm David Zublick:

1. Supreme Court Justice, Ruth Bader Ginsburg has been indicted, pled guilty and would be executed soon. She chose to go the route of Senator John McCain and Former President, George H.W. Bush in accepting a deal to maintain her legacy. Her comments defending pedophilia was her undoing.
2. CIA Director, John Brennan has been indicted. In April 2011, under an assumed name, he was on the FBI's most Wanted List for offering young Mexican and Honduran boys for sale. He has run an organization on the Dark Web that sold young children as young as three for exploitation, plus sold babies for satanic human sacrificial ceremonies.
3. Part of Brennan's child exploitation ring was actually run by the Vatican. He is a senior member of the Vatican, EU, and Security Council of the UN, Red Cross and Peace Corps.

The report below from "All News Pipeline" presents some data that has been available for quite some time now. For years, Dr. Deagel had information that he came into possession of as the result of his web site Deagel.com. He treated Air Force flight personnel in Colorado, and maintained data from various government agencies. Some of that data was very unnerving for Americans once they saw his projection for various populations around the world. Not the least important shown was that of the USA. The population for the USA is estimated to be close to 327-million. However, the population estimated for 2025 was just under 100-million. This begs the question, where did the missing 226-million disappear to? I have studied Dr. Deagel's data files going back at least ten years. U.S. population by 2025 has tended to fluctuate slightly.

With the New World Order plans to reduce the world population to a half-billion, as carved in limestone on the Georgia Guide Stones, in Elberton, GA, it seemed plausible that Dr. Deagel's data was based on some serious analysis. The mystery behind the Georgia Guide Stones suggests there are serious plans afoot to reduce the world's population. As I wrote in my series "*Killing Me Softly*", I have known about the agenda to eliminate 90% of the world's population and that it has been around since 1968-1970, at which time the Club of Rome gave its primary focus to this topic of Population Reduction fifty years ago! The report below indicates that the plan is to reduce the USA to that of a "third" world banana republic. That is if Donald J. Trump's PLAN is derailed or in any unsuccessful.

If These Numbers From A Deep State Sourced Website Are Correct, America Will Be A 3rd World Nation By 2025

Deagel's Forecast Suggests the Depopulation End Game Has Arrived

By Stefan Stanford - All News Pipeline - Live Free Or Die

On December 26th, Susan Duclos gave us more proof that the globalists depopulation agenda for Western Civilization is very real with men under constant, non-stop attack by the global agenda seeking to feminize men, declaring masculinity to be 'toxic' (while the baby murder industry flourishes) and a new study shows 2018 to be one of the lowest birthrate records in the history in America.

With that study echoing this new story over at the Guardian which reports that birthrates in Japan have also fallen to their lowest level in history, we found it extremely interesting and a bit concerning that the website Deagel.com is forecasting almost all Western nations to have drastically reduced population numbers by the year 2025 while many majority Muslim nations are being forecast for the populations in their countries to rise.

As we've reported numerous times on ANP, the website Deagel is forecasting the population of the USA to drop from 326+ million in 2017 to only 99,553,100 people in 2025, a drop

of more than 226 million people. And while Deagel has given their reasons for making such a bizarre forecast as we'll take a look at in more detail at the bottom of this story, we can't help but keep coming back to the horrific economic numbers they're also forecasting for the US by 2025, numbers that make America look like we'll be a 3rd world nation in less than 7 years if Deagel's numbers are somehow correct.

So let's take a look at the bizarre numbers for America being forecast by Deagel as seen in the screenshot above. Besides the most startling numbers that jump out for the US population, being forecast to 'shed' 226 million people in less than 7 years, the stunning economic numbers include a forecast of the US's gross domestic product to drop from \$19 trillion in 2017 to ONLY \$2.4 trillion in 2025. With the GDP per capita expected to drop from \$59,274 in 2017 to only \$24,561 in 2025 and our 'purchase power parity' (PPP) expected to drop from \$59,500 in 2017 to \$24,561 in 2025 America will be a broken nation by then if Deagel is correct. In comparison, the PPP of Venezuela is forecast to be \$12,400 in 2025, a jump up from their PPP of only \$9,132 in 2017, when the Venezuelan people were starving, eating cats, dogs and zoo animals for their next meals.

		Rank	%	World Figures

Purchase Power Parity:	▼ \$16,374	57	141	▼ \$11,634
Military Budget:	▼ \$32 billion	6	2.8	▼ \$1.2 trillion

And how in the world is Deagel forecasting our 2025 military budget to be only \$32 billion in 2025 when it was a whopping \$637 billion in 2017? As we see in the chart, if Deagel is correct, America will be a 3rd world nation by 2025.

And as we'll see in the next grouping of numbers below, America isn't the

only country being forecast to take a major hit with many other Western nations also being forecast by Deagel to be suffering by 2025. Do all of these Deagel numbers help to prove that the globalists have a sinister agenda, an agenda that doesn't end well for freedom and America?

The year 2025 has additional significance, in that the Social Security System is to be dissolved on October 1, 2025. I have written two articles that address this very subject. Tentatively we can only surmise a causal relationship from that which we do know. The U.S. government operates on a fiscal year that begins on October 1st, and ends on September 30th. The dissolution of Social Security would mean certain death for millions dependent on the Social Security "safety net".

AWAKEN

So let's take a look now at population numbers being forecast for other Western nations. According to Deangel, the population of Italy is expected to drop from 62 million in 2017 to 43 million by 2025. France's population is being forecast to drop from 67 million in 2017 to only 39 million by 2025. Canada's 35 million in 2017 is forecast for only 26 million in 2025 while Germany is being forecast to lose a stunning number of people, dropping from 80 million in 2017 to a forecast of only 28 million by 2025. Spain's forecast drop from 49 million in 2017 to only 27 million in 2025 isn't quite as drastic as Germany and even Australia's population is being forecast to drop from 23 million in 2017 to only 15 million in 2025.

And those Western nations were surely not alone with the countries of Sweden, Denmark, Switzerland, Norway, Finland and the UK also being forecast to shed mass numbers of human beings, with the UK's expected drop from 65 million in 2017 to only 14 million in 2025 also one of the biggest drops in Deangel's 2025 forecast. So what does Deangel know that we don't know?

While one college Professor actually applauds the US's record low birth rates, another college professor is actually arguing that human extinction, "*though it might be a tragedy, might also be a good thing*". And as The Independent reported back in April of 2017, Muslim babies will outnumber Christian births by 2035, making Islam the world's fastest growing 'religion' though Islam is really nothing more than a totalitarian political philosophy masquerading as a religion.

And with the globalists seeking to breed Western civilization out of existence, we keep coming back to the United Nations and all of their various programs with names like Agenda 21 and Agenda 2030, nothing less than the calls for global government as Ray Gano perfectly explains for us in this December 18th story over at his website Prophezine: <http://www.raygano.net/agenda-2030-uns-call-for-a-one-world-government/>

And while the mainstream media will continue to call 'global government' a 'conspiracy theory' until they have no more viewers left, German Chancellor Angela Merkel recently told an audience in Berlin that "nation states must today be prepared to give up their sovereignty", ignoring the will of their own people while embracing a 'new world order'.

As we had previously reported on ANP, after Deagel's population forecast for America by 2025 had gone viral within the independent media a few years ago, Deagel went ahead and put out the explanation below as to why they believed that the population in the US would be so drastically reduced, blaming it in a blanket statement as 'a confluence of crisis with a devastating result'. Also comparing what they forecast for the US to the fall of the Soviet Union, Deagel warned that the fall of the USA will be much more devastating to Americans than the fall of the USSR was to the Russian people due to our previous standard of living.

And while websites such as Metabunk claim that the numbers for the US being forecast by Deagel are either a psyop or a tinfoil hat conspiracy theory, as we see in the sources which Deagel gets their information from in the screenshot above, Deagel's sources ARE the 'deep state', including the CIA, Department of State and Department of Defense along with the European Union and the World Bank. Deagel's explanation for their 2025 forecast for America is here.

There have been many questions about the countries forecast specially the one focusing on the United States of America (USA). They won't be answered one by one but below you can find some explanation, thoughts and reflections. We are going to keep this as short as possible.

The majority of the economic and demographic data used in the making of the forecasts is widely available by institutions such as the CIA, IMF, UN, USG, etc. You can see the most relevant data at every single country's page. There is a tiny part of data coming from a variety of shadow sources such as Internet gurus, unsigned reports and others. But all these sources are from the internet and are of public domain for at least a minority. For example, several years ago Dagong, the Chinese ratings agency, published a report analyzing the physical economy of the States comparing it with those of China, Germany and Japan. The conclusion was that the US GDP was something between \$5 to \$10 trillion instead of \$15 trillion as officially reported by the USG. We assume that the official data, especially economic, released by governments is fake, cooked or distorted in some degree. Historically it is well known that the former Soviet Union was making up fake statistics years before its collapse. **Western as well as other countries is**

making up their numbers today to conceal their real state of affairs. We are sure that many people out there can find government statistics in their own countries that by their own personal experience are hard to believe or are so optimistic that may belong to a different country.

The key element to understand the process that the USA will enter in the upcoming decade is migration. In the past, especially in the 20th century, the key factor that allowed the USA to rise to its colossus status was immigration with the benefits of a demographic expansion supporting the credit expansion and the brain drain from the rest of the world benefiting the States. The collapse of the Western financial system will wipe out the standard of living of its population while ending Ponzi schemes such as the stock exchange and the pension funds. The population will be hit so badly by a full array of bubbles and Ponzi schemes that the migration engine will start to work in reverse accelerating itself due to ripple effects thus leading to the demise of the States. This unseen situation for the States will develop itself in a cascade pattern with unprecedented and devastating effects for the economy. Jobs offshoring will surely end with many American Corporations relocating overseas thus becoming foreign Corporations!!!! We see a significant part of the American population migrating to Latin America and Asia while migration to Europe - suffering a similar illness - won't be relevant. Nevertheless the death toll will be horrible. Take into account that the Soviet Union's population was poorer than the Americans nowadays or even then. The ex-Soviets suffered during the following struggle in the 1990s with a significant death toll and the loss of national pride. Might we say "Twice the pride, double the fall"? Nope. The American standard of living is one of the highest, far more than double of the Soviets while having added a services economy that will be gone along with the financial system. When pensioners see their retirement disappear in front of their eyes and there are no servicing jobs you can imagine what is going to happen next. At least younger people can migrate. Never in human history were so many elders among the population. In past centuries people were lucky to get to their 30s or 40s. The American downfall is set to be far worse than the Soviet Union's one. A confluence of crisis with a devastating result.

The two articles by "All News Pipeline" (one in Part 1) reflect upon what true American Patriots are facing in the event that President Donald J. Trump, for whatever reason, is removed from office at any point in time between now and the 2020 Presidential elections. President Trump is attempting to remove the fraudulent Federal Reserve System, the unconstitutional IRS, and return to the rule of Law, under the Constitution. This includes the removal of the WTO and the IMF. The Federal Reserve Notes [FRN's] under President Trump will be ended and the country returned to the "Gold Standard", and we are told that the government of the USA can back up that statement.

1. Since 1913 the British have had control over financial and political affairs of the US through control over our currency and banking system. Behind the Brits orchestrating the criminal enslavement is the Vatican and their "Fiduciary" Agents, the House of Rothschild.
2. That was about to change with implementation of Martial Law. The purpose of Martial Law was to restore the Constitution to the People. We have technically been under a state of

Martial Law since 9/11; and even before that back to 1861. The War Powers Act is re-authorized by the President of the USA, every January since 1861. Today, we face issues similar to those that confronted Lincoln. It is the perennial struggle between national security and civil liberties as the United States is the target of many who would destroy it. If those responsible for the preservation of our country are not permitted measures to save it, there will be nothing left to save. But we can only hope that our presidents will be as Abraham Lincoln: patient, pragmatic and possessing political sensitivity. The War Powers Act has been updated in 1941, 1973, and again in 2001. Americans might be surprised to learn just how readily the president can deploy troops inside the United States.

3. A military operation has been in place for some time. We were now in phase 5 of 5 phases.
4. There were (71,000) indictments about to be served on suspected criminals in government, law enforcement, news media, entertainment, big industry and big tech.
5. The Federal Reserve, WTO and IMF were all coming down and each country would regain their sovereignty and nationalize their own bank.
6. In September, 2018, President George H.W. Bush was tried and pled guilty to money laundering, human trafficking and his role in the death of President John F. Kennedy. In November, 2018 he was executed by lethal injection and **ten Trillion dollars was seized from the Bush organization.**
7. Martial Law and full disclosure would be announced through the Emergency Broadcast System, 4Chan and 8Chan networks.
8. This Plan was called Operation Q.

More details will be forthcoming in what has to be the biggest news story of the century. As the two news articles by "All News Pipeline" indicate, we should expect the "Deep State" to not go down without a fight. 2019 will be a turbulent year by any and all standards of measurement. Please pray for the President, Donald J. Trump and for the "Republic" of the United States of America. I believe that Donald Trump will go down as America's Greatest President for implementing the "PLAN" to restore America back to Rule of Law under the Constitution, "Nationalizing" the House of Rothschild-owned Federal Reserve System.

As a final note, a number of terms are new to our vocabulary and so the reader will need to be patient and as this series continues, many of these terms and groups will be explained. "Q" communicates in abbreviated terms and words. Knowing the status and success of "The PLAN", I for one will be watching the absence of communication on social media by those noted above. The longer the absence, the greater probability they have received their new wardrobe and adapting to prison life!

In the next chapter, we will go explore additional aspects of this tyranny that has affected the lives of the American people, and the saga that has brought us to this pivotal point in American History!

Blessings,
